**upcoming movies 2025 fall: Films from the Future** Andrew Maynard, 2018-11-15 Hard Science Fiction Films that Predict Future Technology “As the breakneck advance of technology takes us into a world that is both exciting and menacing, sci-fi films give us an inkling of what is to come, and what we should avoid.” —Seth Shostak, senior astronomer at the SETI Institute, and host of Big Picture Science #1 Best Seller in Nanotechnology, Computers & Technology, Science Fiction & Fantasy, Mechanical Engineering, and Robotics & Automation, Cybernetics, and Experiments & Projects Dr. Andrew Maynard, physicist and leading expert on socially responsible development of emerging and converging technologies, examines hard science fiction movies and brings them to life. Science and technology are radically changing our world. Films from the Future is an essential guide to navigating a future dominated by complex and powerful new technologies. The jump from room-filling processors to pocket-size super computers is just the beginning. Artificial intelligence, gene manipulation, cloning, and inter-planet travel are all ideas that seemed like fairy tales but a few years ago. And now their possibility is very much here. But are we ready to handle these advances? As Maynard explains, “Viewed in the right way—and with a good dose of critical thinking—science fiction movies can help us think about and prepare for the social consequences of technologies we don’t yet have, but that are coming faster than we imagine.” Dr. Maynard looks at twelve sci-fi movies and takes us on a journey through the worlds of biological and genetic manipulation, human enhancement, cyber technologies, and nanotechnology. Gain a broader understanding of the complex relationship between science and society. The movies include old and new, and the familiar and unfamiliar, providing a unique, entertaining, and ultimately transformative take on the power and responsibilities of emerging technologies. era could have seemingly soured so dramatically as they moved into Phase 4 and beyond. Are things really as bad as they seem? Are the cracks in the Marvel edifice something new, or have they been there all along, but willingly overlooked by audiences who were dazzled by the sprawling, unprecedented spectacle that Marvel initially unleashed on the eager cinematic world? Is this juggernaut really heading for a cliff, and if so, how can it be turned around? The answers may surprise you or they may be the same things you've been thinking all along! **upcoming movies 2025 fall:** *Sound in the American Horror Film* Jeffrey Bullins, 2024-07-11 The crack of thunder, a blood-curdling scream, creaking doors, or maybe complete silence. Sounds such as these have helped frighten and startle horror movie audiences for close to a century. Listen to a Universal classic like *Dracula* or *Frankenstein* and you will hear a very different soundtrack from contemporary horror films. So how did we get from there to here? What scared audiences then compared to now? This examination of the horror film's soundtrack builds on film sound and genre scholarship to demonstrate how horror, perhaps more than any other genre, utilizes sound to manipulate audience response. Beginning with the Universal pictures of the early 1930s and moving through the next nine decades, it explores connections and contrasts throughout the genre's technical and creative evolution. New enthusiasts or veteran fans of such varied films as *The Mummy*, *Cat People*, *The Day the Earth Stood Still*, *Psycho*, *Halloween*, *A Nightmare on Elm Street*, *Scream*, *The Conjuring*, *Paranormal Activity*, and *A Quiet Place* will find plenty to explore, and perhaps a new sonic appreciation, within these pages.

Rather than focusing on the role that certain films, or the cinema as an institution, might play in political consciousness, the book asks a different question: how can the subject of politics in film be thought? This problem is presented in a systematic-theoretical rather than historical manner. The main aim of this book is a retrospective rehabilitation of the psychoanalytical concept of suture, whose political core is progressively revealed. In a second step, this rereading of suture-theory is mediated with the Marxist aesthetics of Fredric Jameson. From the perspective of this reconfigured aesthetics of negativity, films by Hitchcock, Antonioni, Haneke and Kubrick are analyzed as articulations of a political unconscious.

**upcoming movies 2025 fall: *Hollywood's Others*** Katherine Fusco, 2025-09-02 We tend to think about movie stars as either glamorous or relatable. But in the 1920s and 1930s, when the Hollywood star system was taking shape, a number of unusual stars appeared on the silver screen, representing groups from which the American mainstream typically sought to avert its eyes. What did it mean for a white entertainment columnist to empathize with an ambiguously gendered Black child star? Or for boys to idolize Lon Chaney, famous for portraying characters with disabilities? *Hollywood's Others* explores the affective ties between white, non-disabled audiences and the fascinatingly different stars with whom they identified—but only up to a point. Katherine Fusco argues that stardom in this era at once offered ways for viewers to connect across group boundaries while also policing the limits of empathy. Examining fan magazines alongside film performances, she

traces the intense audience attachment to atypical celebrities and the ways the film industry sought to manage it. Fusco considers Shirley Temple's career in light of child labor laws and changing notions of childhood; shows how white viewers responded to Black music in depictions of the antebellum South; and analyzes the gender politics of conspiracy theories around celebrity suicides. Shedding light on marginalized stardoms and the anxieties they provoked, Hollywood's Others challenges common notions about film's capacity to build empathy.
