**best sci fi tv shows 2025: Dangerous Fictions** Lyta Gold, 2025-10-14 In a political moment when social panics over literature are at their peak, *Dangerous Fictions* is a mind-expanding treatise on the nature of fictional stories as cultural battlegrounds for power. Fictional stories have long held an uncanny power over hearts and minds, especially those of young people. In *Dangerous Fictions*, Lyta Gold traces arguments both historical and contemporary that have labeled fiction as dark, immoral, frightening, or poisonous. Within each she asks: How “dangerous” is fiction, really? And what about it provokes waves of moral panic and even censorship? Gold argues that any panic about art is largely a disguised panic about power. There have been versions of these same fights over fiction for centuries. By exposing fiction as a social danger and a battleground of immediate public concern, we can see what each side really wants—the right to shape the future of a world deeply in flux and a distraction from more pressing material concerns about money, access, and the hard work of politics. From novels about people driven insane by reading novels to “copaganda” TV shows that influence how viewers regard the police, Gold uses her signature wit, research, and fearless commentary to point readers toward a more substantial question: Fiction may be dangerous to us, but aren't we also dangerous to it?

**best sci fi tv shows 2025: The Short Story Anthology and Women's Writing** Aleix Tura Vecino, 2025-08-14 Hundreds of anthologies of women's short stories have appeared in the literary market between the 1970s and now. This publishing and cultural phenomenon is considered for the first time in this book, which argues that, during this period, anthologies have become a literary technology used not only to make visible female short story writers, but also to think about, and mould ideas of, womanhood. Through creative and contextualised readings of the most important anthologies produced in this period, this study shows that this literary form has contributed to, and in some cases pioneered, key developments in gender theory and feminist thought, including questions of political combination among women which underlie contemporary global movements such as #MeToo. In doing so, the book also develops the first book-length conceptualisation of the features and meaning-making mechanisms of the short story anthology as a literary form. This book will benefit academics and students working in the fields of short fiction, publishing, and women's studies, as well as feminist scholars and a growing number of specialists interested in the anthology as a literary form worldwide.

**best sci fi tv shows 2025: Man in His Time** Brian W. Aldiss, 2025-04-22 Twenty-two classic science fiction stories spanning the first three decades of the Science Fiction Grand Master’s career. Features “Super-Toys Last All Summer,” the short story that inspired the film A.I. Artificial Intelligence. “Britain’s most versatile and durable and consistently most interesting science-fiction writer presents his own personal ‘best of’: 22 splendid tales. . . . To Aldiss, the human dimension has always been more important than hardware or fireworks—which is why his best stories have a timeless quality weaving intelligence, emotion, and inventiveness.” —Kirkus Reviews (starred review) Winner of the Hugo and Nebula Awards, Brian W. Aldiss was a science fiction author “in competition with no one but himself” (The New York TimesBook Review). In this collection he shows why, offering up twenty-two stories from the first three decades of his career, encompassing a stunning range of ideas, moods, and styles. In the title story we find a man, recently back from an expedition in space, who lives 3.3077 minutes in the future. A meteor shakes things up in a quiet English town in “The Saliva Tree,” an homage to H. G. Wells, and which earned Aldiss the Nebula Award in 1965. A giant lizard-like alien comes to Earth in “Heresies of the Huge God,” and while some believe it is a monster, others worship it. A mother tries to connect with her son through the help of a robot intermediary in “Super-Toys Last All Summer.” Unhappy with the state of his life, a man ventures back in time to hunt dinosaurs in “Poor Little Warrior!” Robots have an existential crisis in “Who Can Replace a Man?” and men travel to Mars to take a picture of the planet’s tallest volcano in “The Difficulties in Photographing Nix Olympica.” Although the stories in this collection were originally published in the 1950s, ’60s, ’70s, and ’80s, they remain just as gripping today. Each conveys a fascinating idea for readers to ponder, and together, they make a perfect introduction to one of British science fiction’s greatest authors.
