best anime 2025 january: Anime complejo Antonio Loriguillo-López, 2025-01-20 El “anime” es uno de los productos más populares del entretenimiento audiovisual global. Reconocible para sucesivas generaciones de espectadores de todo el mundo por el encanto del diseño de sus personajes y por la animación sencilla, el “anime” llega a la segunda década del nuevo milenio como uno de los embajadores de la cultura japonesa, un bien de consumo manufacturado por uno de los núcleos de producción de cultura de masas más importantes del planeta. Pero ¿se trata de un arte formulaico, exento de sofisticación narrativa? Este libro propone un acercamiento a la narración compleja en el “anime”, un rasgo clave en su construcción como identidad cultural a través de series como ‘Evangelion’ o películas como ‘Ghost in the Shell’. ¿Es esta complejidad narrativa la reacción de los productores ante la amenaza de la interactividad de los videojuegos?, ¿obedece a una estrategia que se sirve de la experimentación narrativa en la era de la multipantalla para centrarse en sus múltiples nichos de mercado? o ¿se trata de la hibridación definitiva de modos narrativos anteriormente opuestos: clasicismo frente a arte y ensayo? A través de la poética histórica de los modos de narración y las herramientas de análisis fílmico de la narratología se propone una cronología del “anime” complejo y se constata que sus títulos son hitos clave para el asentamiento de otro tipo de narración en el audiovisual comercial global.

best anime 2025 january: Manga Eike Exner, 2025-07 A groundbreaking story of Japanese comics from their nineteenth-century origins to the present day The immensely popular art form of manga, or Japanese comics, has made its mark across global pop culture, influencing film, visual art, video games, and more. This book is the first to tell the history of comics in Japan as a single, continuous story, focusing on manga as multipanel cartoons that show stories rather than narrate them. Eike Exner traces these cartoons' gradual evolution from the 1890s until today, culminating in manga's explosion in global popularity in the 2000s and the current shift from print periodicals to digital media and smartphone apps. Over the course of this 130-year history, Exner answers questions about the origins of Japanese comics, the establishment of their distinctive visuals, and how they became such a fundamental part of the Japanese publishing industry, incorporating well-known examples such as Dragon Ball and Sailor Moon, as well as historical manga little known outside of Japan. The book pays special attention to manga's structural development, examining the roles played not only by star creators but also by editors and major publishers such as Kōdansha that embraced comics as a way of selling magazines to different, often gendered, readerships. This engaging narrative presents extensive new research, making it an essential read for enthusiasts and experts alike.

best anime 2025 january: Climates. Habitats. Environments. Ute Meta Bauer, 2022-04-05 Artists and writers go beyond disciplinary boundaries and linear histories to address the fight for environmental justice, uniting the Asia-Pacific vantage point with international discourse. Modeling the curatorial as a method for uniting cultural production and science, Climates. Habitats. Environments. weaves together image and text to address the global climate crisis. Through exhibitions, artworks, and essays, artists and writers transcend disciplinary boundaries and linear histories to bring their knowledge and experience to bear on the fight for environmental justice. In doing so, they draw on the rich cultural heritage of the Asia-Pacific, in conversation with international discourse, to demonstrate transdisciplinary solution-seeking. Experimental in form as well as in method, Climates. Habitats. Environments. features an inventive book design by mono.studio that puts word and image on equal footing, offering a multiplicity of media, interpretations, and manifestations of interdisciplinary research. For example, botanist Matthew Hall draws on Ovid’s *Metamorphoses* to discuss human-plant interpenetration; curator and writer Venus Lau considers how spectrality consumes—and is consumed—in animation and film, literature, music, and cuisine; and critical theorist and filmmaker Elizabeth Povinelli proposes “Water Sense” as a geontological approach to “the question of our connected and differentiated existence,”

informed by the “ancestral catastrophe of colonialism.” Artists excavate the natural and cultural DNA of indigo, lacquer, rattan, and mulberry; works at the intersection of art, design, and architecture explore “The Posthuman City”; an ongoing research project investigates the ecological urgencies of Pacific archipelagos. The works of art, the projects, and the majority of the texts featured in the book were commissioned by NTU Centre for Contemporary Art Singapore.
