## Understanding Anxiety and the Role of Breathing

Anxiety is a complex emotional and physiological response characterized by feelings of worry, nervousness, or unease, often about an imminent event or something with an uncertain outcome. When we experience anxiety, our sympathetic nervous system, responsible for the "fight-or-flight" response, becomes activated. This triggers a cascade of physical symptoms, including rapid heart rate, shallow breathing, muscle tension, and increased blood pressure. Paradoxically, the very act of shallow, rapid breathing can exacerbate anxiety by signaling to the brain that there is indeed a threat, creating a feedback loop that intensifies the anxious state.

Conversely, controlled and deep breathing engages the parasympathetic nervous system, which promotes relaxation and counteracts the effects of the sympathetic nervous system. This "rest-and-digest" system helps to slow heart rate, lower blood pressure, and reduce muscle tension, effectively calming the body and mind. By consciously altering our breathing patterns, we can directly influence our physiological and psychological state, interrupting the cycle of anxiety. Many users on Reddit highlight this fundamental connection, emphasizing how simple breathing techniques can be a powerful

antidote to overwhelming anxious feelings.

## **Popular Breathing Exercises for Anxiety on Reddit**

Reddit communities dedicated to mental health, anxiety, and mindfulness are rich with shared experiences and recommendations for effective breathing exercises. These discussions often highlight techniques that are easy to learn, can be practiced anywhere, and provide quick relief. The following are some of the most frequently cited and praised methods.

### **Diaphragmatic Breathing (Belly Breathing)**

Diaphragmatic breathing, often referred to as belly breathing, is considered a foundational technique for anxiety management. It involves consciously engaging the diaphragm, a large, dome-shaped muscle at the base of the chest cavity, to draw air deep into the lungs. When practiced correctly, the abdomen should expand outward on inhalation and contract inward on exhalation, rather than the chest rising significantly. This type of breathing is more efficient and promotes a greater exchange of oxygen and carbon dioxide, signaling to the body that it is safe and relaxed.

To practice diaphragmatic breathing, find a comfortable position, either sitting or lying down. Place one hand on your chest and the other on your abdomen, just below your rib cage. Inhale slowly and deeply through your nose, feeling your abdomen rise as your diaphragm contracts. Your chest should remain relatively still. Exhale slowly through your mouth, gently contracting your abdominal muscles to push all the air out. Many Reddit users find that practicing this for a few minutes multiple times a day significantly reduces their baseline anxiety levels and helps them manage acute episodes.

### **Box Breathing (Four-Square Breathing)**

Box breathing, also known as four-square breathing, is a simple yet highly effective technique for regaining focus and calm during moments of intense anxiety. It involves a consistent rhythm of inhaling, holding, exhaling, and holding again, all for an equal duration, typically four seconds. This structured approach helps to synchronize breath with mind, interrupting racing thoughts and promoting a sense of control.

The technique is practiced as follows:

- Inhale slowly and deeply through your nose for a count of four.
- Hold your breath for a count of four.
- Exhale slowly and completely through your mouth for a count of four.
- Hold your breath again for a count of four.

Repeat this cycle for several minutes. The regularity and controlled pauses are particularly beneficial for individuals who feel overwhelmed and struggle with chaotic thoughts. Many on Reddit report using this method before stressful events or when feeling a panic attack begin.

## **4-7-8 Breathing Technique**

Developed by Dr. Andrew Weil, the 4-7-8 breathing technique is a powerful method for promoting relaxation and aiding sleep, often recommended by Reddit users struggling with insomnia due to anxiety. This technique emphasizes a longer exhale, which is key to activating the parasympathetic nervous system and inducing a calming effect.

The steps for the 4-7-8 technique are:

1. Place the tip of your tongue against the ridge of tissue just behind your upper front teeth, and keep it there throughout the entire exercise.
2. Exhale completely through your mouth, making a "whoosh" sound.
3. Close your mouth and inhale quietly through your nose to a mental count of four.
4. Hold your breath for a count of seven.
5. Exhale completely through your mouth, making another "whoosh" sound, to a count of eight.

This completes one breath cycle. Repeat the cycle for up to four breaths initially. Consistency is key, and many users find that even a few rounds can induce a profound sense of tranquility.

## **Alternate Nostril Breathing (Nadi Shodhana)**

Alternate nostril breathing, or Nadi Shodhana in Sanskrit, is an ancient yogic practice that aims to balance the body's energy channels and promote

mental clarity and calmness. It involves selectively breathing through one nostril at a time, using the thumb and ring finger to open and close the nostrils. This technique is praised on Reddit for its ability to reduce stress, clear the mind, and improve focus.

To practice Nadi Shodhana:

- Sit in a comfortable, upright position.
- Use your right thumb to gently close your right nostril. Inhale deeply through your left nostril.
- Close your left nostril with your ring finger, release your thumb from the right nostril, and exhale through your right nostril.
- Inhale through your right nostril.
- Close your right nostril with your thumb, release your ring finger from the left nostril, and exhale through your left nostril.
- This completes one round. Continue for several minutes.

This rhythmic alternating breath is believed to harmonize the left and right hemispheres of the brain, leading to a balanced emotional state.

## **Pursed-Lip Breathing**

Pursed-lip breathing is a simple technique often recommended for individuals experiencing shortness of breath due to anxiety or other respiratory conditions. It helps to slow down the breathing rate, promote a more complete exhalation, and keep the airways open longer, allowing for more efficient gas exchange. It's a technique that many find easy to implement in stressful situations.

To practice pursed-lip breathing, inhale slowly through your nose for a count of two, as if you were smelling a flower. Then, purse your lips as if you were going to whistle or blow out a candle. Exhale slowly through your pursed lips for a count of four or longer, making the exhale twice as long as the inhale. This technique is particularly useful for managing hyperventilation associated with anxiety attacks, as it helps to stabilize breathing patterns and reduce the feeling of breathlessness.

## **Benefits of Regular Breathing Exercises for**

# Anxiety

The consistent practice of breathing exercises offers a multitude of benefits that extend beyond immediate anxiety relief. When integrated into a regular routine, these techniques can lead to profound and lasting improvements in mental and physical well-being. Many Reddit users share testimonials about the cumulative positive effects they have experienced.

One of the primary benefits is the regulation of the autonomic nervous system. By consciously activating the parasympathetic nervous system, breathing exercises help to lower heart rate, reduce blood pressure, and decrease the production of stress hormones like cortisol. This physiological shift leads to a greater sense of calm and resilience in the face of stressors. Furthermore, deep breathing increases oxygen supply to the brain, which can improve cognitive function, enhance focus, and reduce feelings of mental foggy often associated with anxiety.

Regular practice can also improve sleep quality. Many individuals with anxiety struggle with insomnia, and the relaxation response induced by breathing exercises can make it easier to fall asleep and stay asleep. Additionally, by building awareness of bodily sensations and breath patterns, individuals can become more attuned to the early signs of anxiety, allowing them to intervene proactively with their chosen breathing techniques before anxiety escalates. The empowerment that comes from having a readily available tool to manage distress is a frequently cited benefit on forums like Reddit.

## Integrating Breathing Exercises into Your Routine

Making breathing exercises a regular part of your life is crucial for reaping their full benefits. The key is consistency and finding a rhythm that works for you. Many Reddit users emphasize that it's not about perfection, but about persistence.

Start small by dedicating just 5-10 minutes each day to practice. This could be first thing in the morning to set a calm tone for the day, during a midday break to reset, or before bed to promote relaxation. It's also beneficial to have a few go-to techniques ready for moments of acute anxiety. Practicing when you are calm can help you become more proficient and confident in using them when you are feeling overwhelmed. Some individuals find it helpful to set reminders on their phones or incorporate breathing exercises into existing habits, such as before or after brushing their teeth.

Experiment with different techniques to discover which ones resonate most with your body and mind. What works for one person might not work for

another. Pay attention to how you feel before, during, and after each exercise. Journaling your experiences can also be a valuable tool for tracking progress and identifying patterns. The online communities on Reddit can offer inspiration and accountability as you build this new habit.

## **Finding Support and Information on Reddit**

Reddit serves as an invaluable resource for individuals seeking practical advice and peer support for managing anxiety through breathing exercises. Subreddits such as r/Anxiety, r/mentalhealth, r/Meditation, and r/Mindfulness are filled with users sharing personal anecdotes, detailed explanations of techniques, and encouragement. These communities offer a safe space to ask questions, learn from others' experiences, and find motivation.

When exploring Reddit for breathing exercises for anxiety, look for posts and comments that describe specific techniques, their perceived effectiveness, and tips for implementation. Users often share their "aha!" moments and the challenges they've overcome, which can be incredibly validating and inspiring. It's important to approach online advice with a critical yet open mind, understanding that individual experiences may vary. However, the sheer volume of positive testimonials for various breathing exercises on these platforms underscores their efficacy for many.

Engaging with these communities can provide a sense of not being alone in your struggle with anxiety. You can find detailed guides, links to helpful resources, and direct recommendations from people who have successfully used breathing exercises to improve their quality of life. The collective wisdom shared on Reddit offers a powerful, decentralized platform for learning and self-improvement in anxiety management.

---

### **Q: What are the most commonly recommended breathing exercises for anxiety on Reddit?**

A: On Reddit, the most frequently discussed and recommended breathing exercises for anxiety include Diaphragmatic Breathing (Belly Breathing), Box Breathing, the 4-7-8 Breathing Technique, and Pursed-Lip Breathing. Users often share personal success stories and detailed instructions for these techniques.

### **Q: How quickly can I expect to feel relief from**

## **anxiety using breathing exercises?**

A: Many users on Reddit report experiencing immediate, albeit temporary, relief from anxiety symptoms within minutes of practicing deep breathing exercises. However, for long-term anxiety management and resilience, consistent daily practice is recommended to achieve more sustained benefits.

### **Q: Is it safe to practice breathing exercises if I have a pre-existing medical condition?**

A: While breathing exercises are generally safe for most people, it is always advisable to consult with a healthcare professional before starting any new exercise regimen, especially if you have underlying medical conditions such as asthma, heart disease, or respiratory issues. They can provide personalized guidance.

### **Q: Can breathing exercises help with panic attacks?**

A: Yes, many Reddit users find that breathing exercises are highly effective in managing and mitigating panic attacks. Techniques like Box Breathing and 4-7-8 Breathing can help to slow down the heart rate, reduce hyperventilation, and restore a sense of calm during an attack.

### **Q: How often should I practice breathing exercises for anxiety?**

A: For optimal results, it is recommended to practice breathing exercises daily. Many users on Reddit suggest incorporating them into your routine in short sessions (5-10 minutes) multiple times a day, or using them as needed during moments of stress or anxiety.

### **Q: Are there specific times of day that are better for practicing breathing exercises?**

A: Reddit discussions suggest that any time is beneficial, but many users find practicing in the morning to start the day calmly, during a midday break to reset, or before sleep to improve relaxation and sleep quality to be particularly helpful.

### **Q: What if I find it difficult to breathe deeply or hold my breath?**

A: If you find certain aspects of breathing exercises challenging, Reddit users often advise starting slowly and gently. Focus on the aspects you can manage, such as slow exhalations. It's also suggested to try different

techniques, as some might feel more natural. Patience and gradual practice are key.

## **Q: Can breathing exercises replace professional anxiety treatment?**

A: Breathing exercises are powerful complementary tools for anxiety management but are generally not a replacement for professional treatment like therapy or medication, especially for moderate to severe anxiety disorders. They are best used as part of a comprehensive treatment plan.

**breathing exercises for anxiety reddit:** *The Social Anxiety Workbook for Teens on the Autism Spectrum* Marguerite Dora Nash, Transform Social Challenges into Confidence with This Step-by-Step Workbook for Autistic Teens Navigating friendships, conversations, and social situations can feel overwhelming for teens on the autism spectrum. This practical workbook provides concrete strategies and real-world solutions for building genuine social connections while honoring your authentic self. What You'll Discover: Proven techniques for reading social cues and understanding nonverbal communication Conversation frameworks that work with your natural communication style Sensory management strategies for overwhelming social environments Self-advocacy skills for requesting accommodations and setting boundaries Methods for finding compatible friends who appreciate your unique qualities Recovery strategies for handling awkward moments and social setbacks Practice exercises for school, community, and online social interactions Inside This Comprehensive Guide: Personal sensory profile assessments and coping toolkits Social situation practice scenarios with real-world applications Progress tracking systems to celebrate growth and maintain motivation Emergency social strategies for challenging moments Future planning resources for adult relationships and career success Quick reference guides for immediate social support This workbook recognizes that social skills for autistic teens look different from neurotypical approaches. Instead of masking or changing who you are, you'll learn to build meaningful relationships while maintaining your authentic identity. Perfect for: Autistic teenagers seeking practical social guidance Families supporting their teen's social development Educators and therapists working with autistic students Anyone wanting to understand neurodivergent social experiences Key Features: Evidence-based strategies tailored specifically for autism spectrum differences Interactive worksheets and assessment tools for personalized application Clear explanations of social concepts without overwhelming complexity Respectful, neurodiversity-affirming approach that celebrates autistic strengths Practical tools for immediate implementation in daily social situations Stop struggling with social situations that feel confusing or exhausting. This workbook provides the roadmap for developing authentic social connections that align with your strengths, interests, and communication style. Start building the social confidence you deserve today.

**breathing exercises for anxiety reddit:** What If I'm an Atheist? David Seidman, 2015-03-10 Can you have guidance without God? This thoughtful, one-of-a-kind guide offers answers to all of your questions about atheism and nonbelief. Have you ever wondered what religion and belief means for your life? Maybe you believe in nothing at all. Does that mean you're an atheist? What does atheism even mean? Regardless of the religious background you grew up with, it's natural to question what you believe...or what you don't. Establishing your views about religion and spirituality is part of becoming an individual, but outside pressures can make it tough to know what is right for

you. What If I'm an Atheist? offers a thoughtful exploration of how atheism or the absence of religion can impact your life. From discussing the practical significance of holidays to offering conversation starters and tips, this guide is an invaluable resource about religion, spirituality, and the lack thereof. This compassionate, nonjudgmental guide includes peer interviews featuring both religious and atheist teens and provides a safe space to find answers to the questions you may not want ask out loud, so you can decide what you believe—or don't—for yourself.

**breathing exercises for anxiety reddit: Rewiring the Psychotic Brain** Benjamin Leo McDonald, 2024-10-17 Rewiring the Psychotic Brain: A 30-Day Neuroplasticity-Based Recovery Workbook offers a transformative path for individuals seeking recovery from psychosis. Grounded in the science of neuroplasticity—the brain's ability to change and heal—this practical guide empowers readers to reshape harmful thought patterns and rebuild emotional balance in just 30 days. Through simple daily exercises, mindfulness practices, and reflective journaling, you'll learn how to strengthen healthy brain pathways and reduce distressing symptoms. Each day introduces tools that help you regain control over your thoughts and emotions, paving the way for lasting recovery. Whether you're navigating psychosis yourself or supporting a loved one, this workbook provides the essential steps toward mental clarity, emotional resilience, and long-term healing. Structured for ease and designed to be accessible, Rewiring the Psychotic Brain is a powerful companion on the journey to reclaiming mental health.

**breathing exercises for anxiety reddit: Shared Pain Is Pain Halved. Life is a Story - story.one** Nela J. W., 2024-09-02 We all carry invisible burdens - battles with anxiety, depression, ADHD, and more. Some of us just don't know it yet. But what if you knew you weren't alone? What if understanding your struggles could be the first step toward healing? Shared Pain is Pain Halved offers an overview of common mental health issues, providing insight into what you or someone close to you may be facing, often without even realizing it. Through clear explanations, symptom checklists, and practical advice, this book helps you recognize patterns and find the words to express your experience. Whether you're exploring your own challenges or trying to better understand a loved one's struggles, this book is a reminder that you don't have to navigate this journey alone. Understanding is the first step towards empathy and healing. Start your journey of awareness and connection today.

**breathing exercises for anxiety reddit: Stress Psychology** Prof. Dr. Bilal Semih Bozdemir, Stress Psychology Understanding Stress Causes of Stress Physiological Responses to Stress Cognitive-Emotional Aspects of Stress Coping Strategies Building Resilience Stress Management Techniques

**breathing exercises for anxiety reddit: Unresolved Childhood Trauma Workbook** Occhave Bennett Elder, 2025-01-20 Unresolved Childhood Trauma Workbook: Proven Techniques for Healing, Emotional Regulation, and Building Healthy Relationships offers a step-by-step programme for those who want to conquer the hidden burdens of early-life adversity. This carefully structured guide integrates therapeutic strategies from fields such as cognitive-behavioural therapy and attachment-based interventions. It focuses on methods that have been tested in clinical settings and are known to be effective. Readers can expect to find: Focused exercises that address long-standing emotional wounds Evidence-based guidelines for regulating intense feelings and reducing distress Worksheets that encourage clarity in self-reflection, ensuring that insights translate to daily life Practical tips on boundary-setting, trust-building, and creating supportive relationships Case examples illustrating how others have used the same approaches to progress toward a more balanced life A user-friendly style that removes academic jargon and makes each concept easy to follow This workbook recognises the complicated effects that childhood adversity can have on adult well-being, including disruptive thought patterns, chronic worries, and difficulties forming close connections. Its pages offer tools for managing flashbacks, tracking triggers, and shifting painful narratives. Clear instructions and checklists also allow you to measure your progress over time, reinforcing that each step can reinforce self-assurance and personal growth. You will find that the strategies do not stop with surface-level change. They guide you toward deep, long-lasting

transformation of your mindset and outlook on life. Each chapter is written in plain language, ensuring that readers can apply the activities right away. If you have never considered therapy or already see a counsellor, these pages will complement your journey. They offer daily practices, journaling prompts, and grounding techniques that fit into a busy schedule. The aim is to make emotional healing an ongoing, achievable project, not a daunting undertaking. If you have grappled with unresolved hurt from childhood, this workbook provides steps to release old burdens, strengthen self-trust, and expand your capacity to form healthy, respectful bonds. By following the exercises with diligence, you can shift your focus from simply coping toward truly thriving.

**breathing exercises for anxiety reddit: CompTIA Security+ certification guide** Cybellium, Fortify Your Career with the CompTIA Security+ Certification Guide In an era where cyber threats are relentless and security breaches are headline news, organizations demand skilled professionals to safeguard their digital assets. The CompTIA Security+ certification is your key to becoming a recognized expert in cybersecurity fundamentals and best practices. CompTIA Security+ Certification Guide is your comprehensive companion on the journey to mastering the CompTIA Security+ certification, providing you with the knowledge, skills, and confidence to excel in the world of cybersecurity. Your Gateway to Cybersecurity Excellence The CompTIA Security+ certification is globally respected and serves as a crucial credential for aspiring and experienced cybersecurity professionals. Whether you are beginning your cybersecurity journey or seeking to validate your expertise, this guide will empower you to navigate the path to certification. What You Will Explore CompTIA Security+ Exam Domains: Gain a deep understanding of the six core domains covered in the CompTIA Security+ exam, including threats, attacks, and vulnerabilities; technologies and tools; architecture and design; identity and access management; risk management; and cryptography and public key infrastructure. Cybersecurity Fundamentals: Dive into the fundamentals of cybersecurity, including threat identification, risk assessment, security protocols, and security policies. Practical Scenarios and Exercises: Immerse yourself in real-world scenarios, hands-on labs, and exercises that mirror actual cybersecurity challenges, reinforcing your knowledge and practical skills. Exam Preparation Strategies: Learn proven strategies for preparing for the CompTIA Security+ exam, including study plans, recommended resources, and expert test-taking techniques. Career Advancement: Discover how achieving the CompTIA Security+ certification can open doors to exciting career opportunities and significantly enhance your earning potential. Why CompTIA Security+ Certification Guide Is Essential Comprehensive Coverage: This book provides comprehensive coverage of CompTIA Security+ exam topics, ensuring you are well-prepared for the certification exam. Expert Guidance: Benefit from insights and advice from experienced cybersecurity professionals who share their knowledge and industry expertise. Career Enhancement: The CompTIA Security+ certification is globally recognized and is a valuable asset for cybersecurity professionals looking to advance their careers. Stay Vigilant: In a constantly evolving threat landscape, mastering cybersecurity fundamentals is vital for protecting organizations and staying ahead of emerging threats. Your Journey to CompTIA Security+ Certification Begins Here CompTIA Security+ Certification Guide is your roadmap to mastering the CompTIA Security+ certification and advancing your career in cybersecurity. Whether you aspire to protect organizations from cyber threats, secure sensitive data, or lead cybersecurity initiatives, this guide will equip you with the skills and knowledge to achieve your goals. CompTIA Security+ Certification Guide is the ultimate resource for individuals seeking to achieve the CompTIA Security+ certification and excel in the field of cybersecurity. Whether you are new to cybersecurity or an experienced professional, this book will provide you with the knowledge and strategies to excel in the CompTIA Security+ exam and establish yourself as a cybersecurity expert. **breathing exercises for anxiety reddit:** *Serene Paths* Yona Kreiger, AI, 2025-02-19 *Serene Paths* offers a practical guide to achieving inner peace through mindfulness, emotional regulation, and cognitive restructuring. It addresses the need for accessible tools to manage stress and enhance emotional wellbeing, helping readers cultivate a balanced life. The book presents evidence-based techniques, such as mindful breathing and cognitive restructuring, to challenge negative thoughts and foster resilience. Did you know that consistent mindfulness practice can alter brain structures associated with attention and emotion regulation, leading to improved focus and reduced reactivity? Also, cognitive restructuring, a core component, helps individuals recognize that our interpretations of events, rather than the events themselves, often dictate our emotional responses. The book uniquely integrates mindfulness, emotional regulation, and cognitive restructuring into a holistic framework. It begins by introducing these core concepts and then delves into specific techniques, like meditation and self-compassion, offering step-by-step guidance. Each chapter builds upon the previous one, culminating in practical tips for integrating these practices into daily life, making serenity an active and achievable practice.

**breathing exercises for anxiety reddit: Deep Breathing Exercises for Anxiety** Angira Lisbon, 2014-11-13 If you want to learn how to defeat anxiety and stress immediately, quietly, and without even having to physically isolate yourself from your surroundings, then this book is for you! Stress, panic, and anxiety are a part of daily modern life, and the longer they are ignored, the worse they become. While some people are lucky enough to find their own internal calm, most just pretend to be fine until these problems lead to graver health issues like heart complications, respiratory disorders, or panic attacks. Oftentimes, you find yourself in stressful situations where relaxing through external means just isn't practical or feasible. Advice from experts telling you to keep yourself calm is about as useful as a plastic spoon when fighting an alligator. This book was designed specifically to guide you through incredibly effective breathing exercises that can be done

immediately, quietly, and on the down-low, without the need for anything other than regulating your own breathing. So, are you ready to unlock the pathway to calm without the need for any feel-good pill-popping prescriptions or expensive therapies? Are you ready to learn the most basic and easiest of ways to beat anxiety through the regulation of your own inner peace? Let's get started!

**breathing exercises for anxiety reddit: Breathwork** Andrew Smart, 2020-05-19 Harness the power of your breath to nourish your mind, body, and spirit. For anyone in search of peace, clarity, and calm, Breathwork is an all-levels handbook of breathwork techniques—the practice of combining breathing exercises with meditation. Decrease anxiety, foster energy, and build awareness using breathwork traditions. • Covers foundational breathing techniques from a range of traditions—including Zen breathing, Somatic breathing, and Holotropic breathing • Teaches simple-to-follow breathing exercises that you can do on your own • Unintimidating and highly accessible to beginners With practices for energy, healing, awareness, stress relief, and more, this all-levels guide gives you everything you need to find balance and clarity. All you need is your breath to foster health and happiness. • The perfect gift for anyone seeking simple self-care techniques to help for their mind, body, and spirit • A useful skill to learn and pair with other mindfulness practices, such as meditation and yoga • Great for readers who enjoyed *The Little Book of Mindfulness* by Patricia Collard, *Calm* by Michael Acton Smith, and *The Healing Power of the Breath* by Richard Brown

**breathing exercises for anxiety reddit: Be Still and Breathe** Machel Shull, 2020-12-31 Inspired by her own personal experiences during the Corona Virus Pandemic and working each day at an essential workplace encountering thousands of people when most of the world was on lockdown, Machel (Ma-shel) wrote this succinct, short book as a reminder to take a seat and do the work, breathe deep and let go. Discover the power of breath, the power of prayer and the power of words and how we can use them against any circumstances that threaten to defeat us. Inside this book are -Suggested Affirmations and Mantras to help bolster Peace, affirmations from Florence Scovel Shinn, breathing exercises to help combat fear and anxiety, prayers for daily peace, suggested Bible verses to commit to memory and the science behind why affirmations, prayer and breathing exercises reduce anxiety. Machel Shull is a 500-hour RYT yoga teacher in San Diego County, California where she teaches weekly. You can join her on YouTube at Gentle Yoga TV. Subscribe to the yoga channel to receive an alert when free yoga video is available to practice yoga weekly. This is Machel's 5th book. She has been featured in the NY Post, Daily UK Mail, Wisdom Magazine, Mind Body Green, and other media outlets for her soulful writing on wellness and beauty. In 2016, Midwest Reviews from the Small Press Publishing Shelf endorsed LIVE LOVE SOUL saying, If you read only one self-help book in 2016, make it Mrs. Shull's book LIVE LOVE SOUL. For more information on this book or her other books, check out MachelShull.com.

**breathing exercises for anxiety reddit: Breathe Well, Be Well** Robert L. Fried, 1994-04 A Program to Relieve Stress, Anxiety, Asthma, Hypertension, Migraine, and Other Disorders for Better Health Take a deep abdominal breath. That's the prescription from leading stress and anxiety treatment expert Robert Fried. This straightforward self-improvement guide shows you how to take advantage of several easy breathing techniques and exercises to effectively reduce stress--the most common health complaint in North America--as well as many other health problems. Dr. Fried presents simple breathing exercises anyone can do, any time--at your desk or in bed as you're dropping off to sleep. In this book, you'll receive expert advice on: \* The Hows and Whys of Breathing--your lungs and the science of respiration. \* The Five-Day Program for Better Breathing and Relaxation--the connection between stress/relaxation and abdominal breathing. \* Nutrition and Breathing--foods that can actually improve your blood circulation. \* Specific Health Disorders--discover the link between breathing and asthma, migraines, hypertension, anxiety, and depression.

**breathing exercises for anxiety reddit: Self-Healing with Breathwork** Jack Angelo, 2012-10-09 Conscious breathing practices for health, healing, and connecting with the sacred • Provides 57 conscious breathing and visualization practices • Shows how awareness of the breath

can relieve stress and anxiety, improve sleep and digestion, increase creativity and mental focus, promote emotional calm, boost energy levels, clear negative energy, and provide support for physical healing • Explains how to use breathwork to commune with the elements and the sacred as well as how to train your voice for more effective chanting and prayer All effective healing begins with the breath, for our breath carries life force into our bodies. By becoming aware of our breathing, we can refine our receptivity to subtle energies for both self-healing and healing others and recognize our connection to all other living, breathing beings on Earth. Providing 57 conscious breathing and visualization practices, Jack Angelo shows how breathwork can relieve stress and anxiety, improve sleep and digestion, increase creativity and mental focus, promote emotional calm, boost energy levels, enhance meditation, clear negative energy, and provide support for physical healing. He explains how to use breathwork to commune with the elements and the sacred as well as how to train your voice for more effective chanting and prayer. He shows how, through conscious breathing, we can harness the healing life force available in each breath for energetic balance, heightened consciousness, and overall wellness as well as a deeper connection to the sacred source of all life.
