how to make money online namibia: *Financing Africa* Samuel Munzele Maimbo, Issa Faye,

Thouraya Triki, 2011-09-07 Financing Africa takes stock of Africa's financial systems in light of recent changes in the global financial system --including the greater risk aversion of international investors, a shift in economic and financial powers towards emerging markets and the regulatory reform debate - and the increasing role of technology. Using a wider and more detailed array of data than previous publications, we observe a trend towards financial deepening, more stability and more inclusion leading up to the crisis; serious challenges, however, continue, including limited access to financial services, focus on short-term contracts and hidden fragility, related to weak regulatory frameworks, undue government interference and governance deficiencies. Our policy analysis therefore focuses on (i) expanding outreach, (ii) fostering long-term finance and (iii) improving regulation and supervision. We identify the positive role of innovation and competition, a stronger focus on non-traditional financial service providers, and more emphasis on demand-side constraints as priority areas for policy actions. Specifically, competition from new players outside the banking system, including telecomm companies can increase outreach with technological innovation that changes the economics of retail finance. Moving beyond national stock exchanges that are not sustainable in most African countries towards regional solutions and over-the-counter trades can help foster long-term finance, as can addressing governance challenges in contractual savings institutions, including life insurance companies and pension funds. Finally, there is a need to look beyond supply-side constraints towards users of financial services, focusing more on financial literacy of households and firms, but also consumer protection. In formulating policy messages, we carefully distinguish between different country groupings, differentiating -- among others -- between low- and middle-income and small and larger economies, with a special focus on resource-based economies and post-conflict countries. This book reaches out to both policy makers concerned about a more inclusive and effective financial system and other stakeholders, including practitioners and development partners. With this book we aim to contribute to the on-going financial sector debate on Africa, with the ultimate goal of faster economic development and poverty reduction.

how to make money online namibia: “Beggars on our own land ...” Willem Odendaal, 2024-03-27 In 1954, the Haillom people were evicted from Etosha by the South African-controlled South West African Administration. In 2015, the Haillom filed the case of Tsumib v Government of the Republic of Namibia in the High Court of Namibia. Beggars on our own land ... unravels the historical and contemporary socio-legal complexities that led to the Tsumib case. At the core of the case lies the legal question, how can the Haillom people approach the Namibian Courts in order to claim compensation for the loss of their ancestral lands? Odendaal goes into detail how the Tsumib case materialised under the post-independence Namibian constitutional discourse. He assesses the Namibian land reform programme and its oversight in dealing with historical land dispossessions. He inspects Haillom identity and how it was used to strengthen their case. He concludes with an examination of Namibia's outdated and restrictive legal framework, which ultimately denied the Haillom people their constitutional right to be heard in the Namibian Court. While the future of ancestral land claims in Namibia depends on the political will of the Namibian government, Odendaal argues that the Namibian courts have a duty to comply with the rights giving nature of the

Namibian Constitution that lays the foundation for the Haillom people's ancestral claims.

how to make money online namibia: Celebrity, Inc. Jo Piazza, 2011-11-15 From \$10,000 tweets to making money in the afterlife, a recovering gossip columnist explores the business lessons that power the Hollywood Industrial Complex Why do celebrities get paid so much more than regular people to do a job that seems to afford them the same amount of leisure time as most retirees? What do Bush-era economics have to do with the rise of Kim Kardashian? How do the laws of supply and demand explain why the stars of Teen Mom are on the cover of Us Weekly? And how was the sale of Brad Pitt and Angelina Jolie's baby pictures a little like a street drug deal? After a decade spent toiling as an entertainment journalist and gossip columnist, Jo Piazza asks the hard questions about the business behind celebrity. Make no mistake: Celebrity is an industry. Never in the course of human history has the market for celebrities been as saturated as it is today. Nearly every day most Americans will consume something a celebrity is selling—a fragrance, a sneaker, a song, a movie, a show, a tweet, or a photo in a magazine. With the benefits of Piazza's unique access to the celebrity market, Celebrity, Inc. explains in detail what generates cash for the industry and what drains value faster than a starlet downs champagne—in twelve fascinating case studies that tackle celebrities the way industry analysts would dissect any consumer brand.
