Frequently Asked Questions

## Understanding Your Retirement Needs

The first step in determining how much to save for retirement in Malaysia is to accurately assess your projected expenses during your post-working life. This involves looking beyond basic living costs and considering healthcare, travel, hobbies, and potential emergency funds. A common benchmark suggests that individuals may need 70-80% of their pre-retirement income to maintain a similar lifestyle. However, this figure is highly individual and depends on various personal factors.

It's crucial to consider the inflation rate in Malaysia. Over a period of 20-30 years, inflation can significantly erode the purchasing power of your savings. Therefore, your retirement savings target needs to account for the anticipated increase in the cost of goods and services. A conservative estimate of annual inflation, perhaps around 3-4%, should be factored into your long-term financial projections. This ensures that your savings will retain their value and be sufficient to cover future expenses.

## Estimating Your Monthly Retirement Expenses

To effectively estimate your monthly retirement expenses, you need to create a detailed budget. Start by listing all your current essential expenses: housing (mortgage or rent), utilities, food, transportation, and insurance premiums. Then, consider discretionary spending like entertainment, dining out, hobbies, and travel. It's also vital to anticipate new expenses that may arise in retirement, such as increased healthcare costs, potential medical aid, and the cost of any necessary home modifications for accessibility.

For a more realistic projection, try to adjust your current spending habits to reflect a retirement lifestyle. For instance, your commuting costs might decrease, but your expenditure on leisure activities or hobbies might increase. Think about how you envision your retirement days: will you be traveling extensively, pursuing new educational interests, or spending more time with family? Each of these scenarios will have a different financial implication that needs to be carefully accounted for in your savings plan.

## **Considering Your Expected Retirement Age and Lifespan**

Your expected retirement age significantly impacts the total amount you need to save. Retiring earlier means a longer period during which you will be drawing from your savings, thus requiring a larger lump sum. Conversely, working a few extra years can substantially reduce the pressure on your savings. Similarly, life expectancy plays a critical role; you need to save enough to cover your expenses for as long as you are likely to live.

It's prudent to plan for a longer lifespan than the average, given advancements in healthcare and lifestyle. Aiming to have sufficient funds for at least 25-30 years after retirement is a common recommendation. This provides a buffer and peace of mind, ensuring you are financially secure even if you live a longer, fulfilling life. When calculating, use your current age and subtract your desired retirement age to determine the number of years you will be retired, then multiply your estimated annual retirement expenses by this number.

## **Factors Influencing Your Retirement Savings Goal**

Several interconnected factors will shape your individual retirement savings goal in Malaysia. Understanding these variables is key to setting a realistic and achievable target. These elements range from your current financial situation to your future aspirations and the economic landscape.

### **Current Income and Savings Rate**

Your current income is a primary determinant of how much you can afford to save. A higher income generally allows for a greater savings capacity, provided your expenses are managed effectively. The percentage of your income that you consistently save each month directly impacts the growth of your retirement fund. A disciplined savings rate, even if modest initially, compounded over time, can lead to substantial wealth accumulation.

It's important to assess your current savings rate and identify opportunities to increase it. This might involve reviewing your budget, cutting unnecessary expenses, or allocating a portion of any salary increases directly to your retirement savings. The earlier you start saving and the higher your initial savings rate, the less you'll need to rely on aggressive investment strategies or later-life contributions.

## **Lifestyle and Spending Habits**

Your desired lifestyle in retirement will significantly influence how much you need to save. If you envision a retirement filled with travel, expensive hobbies, or frequent dining out, your savings target will be considerably higher than someone who prefers a more modest and home-centric lifestyle. Your current spending habits also offer clues to your future needs; individuals who are accustomed to a high-spending lifestyle may find it challenging to drastically cut back in retirement.

Consider whether you plan to downsize your home, move to a less expensive area, or maintain your current standard of living. Each choice has distinct financial implications. For instance, relocating to a smaller town might reduce housing and living costs, allowing your savings to stretch further. Conversely, maintaining a large family home and its associated expenses will require a more substantial nest egg.

## **Dependents and Financial Obligations**

The presence of dependents and other financial obligations can substantially alter your retirement savings needs. If you are supporting children through their education or caring for elderly parents, these responsibilities will extend into your potential retirement years, requiring additional funds. Similarly, outstanding debts, such as mortgages or personal loans, need to be factored into your financial planning.

Ideally, aim to be debt-free by the time you retire. This frees up a significant portion of your income that would otherwise go towards loan repayments. If debt is unavoidable, ensure you have a clear plan to manage it during retirement or to pay it off before you stop working. The financial burden of dependents should be carefully assessed, including their anticipated needs and duration of support.

## **Calculating Your Target Retirement Fund**

Calculating your target retirement fund in Malaysia requires a structured approach, moving from estimated annual expenses to a comprehensive lump sum goal. This process involves several key calculations to ensure accuracy and adequacy for your future financial well-being.

### **The 4% Rule (A Guideline)**

The 4% rule is a popular guideline used by financial planners to estimate how much a retiree can withdraw from their savings each year without depleting the principal too quickly. It suggests that you can safely withdraw 4% of your total retirement savings in the first year of retirement, and then adjust that amount for inflation in subsequent years. This rule is based on historical market returns and aims to provide a sustainable income stream over a 30-year retirement period.

For example, if your estimated annual retirement expenses are RM50,000, using the 4% rule, your

target retirement fund would be RM1,250,000 ( $\text{RM}50,000 / 0.04$ ). It's important to note that this is a guideline, and actual safe withdrawal rates can vary depending on market volatility, investment choices, and individual circumstances. Some planners suggest a more conservative rate of 3% or 3.5% for greater security.

## Using Retirement Calculators

Numerous online retirement calculators are available to assist you in estimating your target retirement fund. These tools typically ask for information such as your current age, desired retirement age, current savings, expected annual income, estimated retirement expenses, and anticipated rate of return on investments. They then project your future savings based on these inputs and provide an estimated retirement fund goal.

Using a variety of reputable retirement calculators can provide a more comprehensive picture. Different calculators may use slightly different assumptions, so comparing the results can help you arrive at a more robust savings target. These calculators are invaluable for visualizing your financial trajectory and understanding the impact of different saving and investment strategies.

## Scenario Planning and Adjustments

It's crucial to engage in scenario planning to account for uncertainties and make necessary adjustments to your retirement savings goal. Consider best-case, worst-case, and most-likely scenarios for your investment returns, inflation rates, and healthcare expenses. This approach helps you prepare for a range of possibilities and build resilience into your financial plan.

For instance, if you experience lower-than-expected investment returns or higher inflation, you might need to work longer, save more aggressively, or adjust your retirement lifestyle to be more conservative. Conversely, if your investments perform exceptionally well, you might be able to retire earlier or enjoy a higher standard of living in retirement. Regular reviews and adjustments of your savings plan are essential to stay on track.

## Strategies for Saving for Retirement in Malaysia

Effectively saving for retirement in Malaysia involves a multi-faceted approach that combines consistent saving habits with smart investment choices. Developing a proactive strategy can make a significant difference in achieving your financial goals.

## Prioritizing Savings and Automation

The most fundamental strategy is to prioritize saving by treating it as a non-negotiable expense. Many financial experts recommend the "pay yourself first" approach. This means allocating a portion

of your income to savings and investments immediately upon receiving your paycheck, before any other discretionary spending. Automating your savings by setting up regular, automatic transfers from your current account to your retirement savings account is highly effective.

This automation removes the temptation to spend the money and ensures consistent progress towards your goal. Even a small, regular contribution can grow significantly over time due to the power of compounding. The key is consistency and discipline. Regularly reviewing your automated savings to ensure they align with your evolving financial situation and goals is also important.

## **Maximizing Contributions to Retirement Funds**

For employed individuals in Malaysia, maximizing contributions to their Employees Provident Fund (EPF) is a cornerstone of retirement planning. The EPF offers competitive returns and is a tax-advantaged savings vehicle. Understanding your contribution rate and considering the option to make voluntary excess contributions can further boost your retirement nest egg. The government also provides incentives for certain retirement savings plans.

Beyond the EPF, consider setting up additional retirement savings accounts or investment portfolios. These can include Unit Trusts, mutual funds, or even direct investments in stocks or bonds. Diversifying your retirement savings across different asset classes can help manage risk and potentially enhance returns. Always research and understand the risks and potential rewards associated with any investment vehicle.

## **Regularly Reviewing and Adjusting Your Plan**

Your retirement savings plan should not be a static document. Life circumstances, economic conditions, and personal goals can change over time, necessitating regular reviews and adjustments. It's advisable to review your plan at least annually, or whenever significant life events occur, such as a change in employment, marriage, or the birth of a child. This ensures that your savings strategy remains aligned with your current reality and future aspirations.

During these reviews, assess your progress towards your savings goal. Are you on track? Are your investments performing as expected? Are there opportunities to increase your savings rate or adjust your investment allocation? Making timely adjustments can prevent you from falling behind and help you stay motivated on your path to a secure retirement.

## **Government Schemes and Benefits for Retirement**

Malaysia offers several government-backed schemes and benefits designed to support individuals in their retirement planning. Understanding these provisions can significantly enhance your ability to build a substantial retirement fund.

## **Employees Provident Fund (EPF)**

The Employees Provident Fund (EPF) is the primary retirement savings scheme in Malaysia. It is mandatory for all private sector employees and voluntary for self-employed individuals. Both employers and employees contribute a percentage of the employee's salary to their EPF account. The EPF invests these contributions in a diversified portfolio, aiming to provide stable and competitive returns.

EPF members have access to their savings upon reaching the age of 55, or through other withdrawal schemes for specific purposes like housing or medical needs. The dividends declared by EPF are tax-exempt for amounts up to RM5,000 annually for members below 55. For members aged 55 and above, the entire dividend is tax-exempt.

## **Private Retirement Schemes (PRS)**

Private Retirement Schemes (PRS) are voluntary, supplementary retirement savings plans designed to complement EPF savings. They are managed by professional fund management companies and offer a wider range of investment options. A significant incentive for contributing to PRS is the tax relief available. Individuals can claim tax deductions on their PRS contributions, up to a certain annual limit.

PRS funds are invested in various sub-funds with different risk profiles, allowing individuals to choose options that align with their risk tolerance and investment horizon. The tax relief offered by PRS makes it an attractive option for individuals looking to boost their retirement savings and reduce their taxable income simultaneously.

## **Making Informed Investment Decisions**

Once you have a clear savings target, making informed investment decisions becomes paramount to growing your retirement fund effectively. The goal is to achieve a balance between risk and return that is suitable for your long-term objectives.

## **Understanding Risk and Return**

Investment involves a trade-off between risk and return. Generally, higher potential returns come with higher risk, while lower-risk investments typically offer lower returns. For retirement savings, which are long-term in nature, a balanced approach is often recommended. This means investing in a diversified portfolio that includes a mix of asset classes with varying risk profiles.

Younger individuals with a longer time horizon can generally afford to take on more risk, opting for growth-oriented investments like equities. As retirement approaches, it's advisable to gradually shift towards more conservative investments to preserve capital and reduce volatility. Understanding

your personal risk tolerance is the first step in making sound investment choices.

## **Diversification of Investments**

Diversification is a fundamental principle of investing that involves spreading your investments across different asset classes, industries, and geographical regions. This strategy helps to mitigate risk because if one investment performs poorly, the losses can be offset by gains in other areas of your portfolio. For retirement savings, diversification can include a mix of:

- Equities (stocks)
- Fixed income securities (bonds)
- Real estate
- Money market instruments
- Alternative investments (if appropriate and understood)

A well-diversified portfolio can provide a smoother investment journey and help you achieve your retirement goals with greater confidence. It's about not putting all your eggs in one basket, ensuring that your overall retirement savings are resilient to market fluctuations.

## **Seeking Professional Financial Advice**

Navigating the complexities of retirement planning and investment can be challenging. Seeking advice from a qualified and licensed financial advisor in Malaysia can be invaluable. A financial advisor can help you assess your current financial situation, define your retirement goals, create a personalized savings and investment plan, and provide ongoing guidance and support.

They can assist in selecting appropriate retirement savings products, managing investment portfolios, and ensuring your plan remains on track as your circumstances evolve. Professional advice can provide clarity, confidence, and a strategic advantage in achieving your long-term financial security.

FAQ Section

### **Q: How much should I aim to save monthly for retirement in Malaysia?**

A: The amount you should aim to save monthly for retirement in Malaysia depends heavily on your current age, desired retirement age, lifestyle, and income. A general guideline is to save at least

15-20% of your income. For example, if you earn RM5,000 per month, aiming to save RM750-RM1,000 monthly would be a good starting point. However, this should be adjusted based on your individual retirement needs and goals.

## **Q: Is EPF alone enough for retirement in Malaysia?**

A: For many Malaysians, EPF alone may not be sufficient to cover their entire retirement needs, especially if they desire a comfortable lifestyle or anticipate a long retirement period. While EPF provides a solid foundation, supplementing it with other savings vehicles like Private Retirement Schemes (PRS) or personal investments is often recommended to ensure adequate financial security.

## **Q: At what age should I start seriously saving for retirement in Malaysia?**

A: The earlier you start saving for retirement in Malaysia, the more beneficial compounding will be. Ideally, you should start as soon as you begin your working career, even with small amounts. However, if you're in your 20s or 30s, you have a significant advantage. If you're in your 40s or 50s, you'll need to save more aggressively to catch up.

## **Q: How does inflation affect my retirement savings target in Malaysia?**

A: Inflation erodes the purchasing power of your money over time. If your retirement savings do not grow at a rate higher than inflation, the real value of your money will decrease. Therefore, when calculating your retirement savings target in Malaysia, it's crucial to factor in an estimated annual inflation rate (e.g., 3-4%) to ensure your savings will maintain their value and meet your future expenses.

## **Q: What are the main differences between EPF and PRS in Malaysia?**

A: EPF is a mandatory retirement savings scheme for private sector employees, offering a fixed contribution rate and generally stable returns. PRS, on the other hand, is a voluntary supplementary scheme with various fund options managed by professional fund managers, offering greater investment flexibility and tax relief incentives. EPF is your primary safety net, while PRS is for enhancing your retirement nest egg.

## **Q: How much of my current income should be allocated to retirement if I'm in my 40s in Malaysia?**

A: If you are in your 40s in Malaysia and haven't saved significantly for retirement, you will need to allocate a larger portion of your income. Aiming for 20-25% or even more of your monthly income towards retirement savings would be advisable. This aggressive saving rate, combined with smart investment strategies, can help you bridge the gap and achieve your retirement goals.

## Q: Can I withdraw my EPF savings to invest in the stock market in Malaysia?

A: EPF offers a Flexible Withdrawals scheme where members can withdraw a portion of their savings from Account 1 to invest in approved unit trust funds managed by fund management institutions appointed by EPF. This allows members to potentially grow their savings through market investments, but it also carries risks, and it's essential to understand these before making a decision.

## Q: What is a reasonable lifespan to plan my retirement savings for in Malaysia?

A: It is prudent to plan your retirement savings for a lifespan of at least 25 to 30 years after you retire in Malaysia. Given advancements in healthcare and increasing life expectancies, planning for a longer period provides a greater sense of security and ensures your funds will last throughout your retirement years.

**how much to save for retirement malaysia:** *Consumer Financial Vulnerabilities in Malaysia* Nurul Shahnaz Ahmad Mahdzan, Mohd Edil Abd Sukor, Izlin Ismail, Mahfuzur Rahman, 2020-11-29 This book examines four aspects of Malaysian consumers' financial vulnerabilities. First, it discusses the issue of over-indebtedness due to excessive reliance on consumer financing. Second, the book investigates why Malaysians are ill-prepared for their golden years in terms of retirement planning and savings. Third, it delves into the problem of financial fraud victimisation among Malaysian consumers. Fourth, the book analyses the reasons why Malaysians are underinsured despite the distinct benefits of life insurance. Drawing on secondary data from government agencies such as Bank Negara Malaysia, Employees' Provident Fund, Royal Malaysian Police and the Department of Statistics Malaysia, each chapter presents statistical trends reflecting the four financial vulnerabilities. In-depth analyses of the literature reveal three broad psychological domains (cognition, motivation, and disposition) and specific psychological factors (e.g. over-confidence, self-control, social norms, and financial literacy) that significantly influence consumers' financial decisions. The four financial vulnerabilities investigated in this book directly address the strategic outcomes of the Malaysian National Strategy for Financial Literacy 2019-2023 (MNSFL), a five-year plan to elevate the financial literacy of Malaysians. Finally, the book presents strategic recommendations that are believed to be useful guidelines for relevant policymakers to promote positive financial behaviours and rational attitudes among consumers. It will be a useful resource for policymakers and researchers interested in economic psychology and behavioural finance.

**how much to save for retirement malaysia:** *Issues of Ageing in Malaysia* Paraidathathu Thomas, Filzah Md Isa, 2024-09-06 This book aims to open up discussion of research findings on ageing issues in Malaysia. The increasing ageing population is an issue across all nations. In due

time, there will be more older adults as compared to children. Based on calculations made by the consulting group Deloitte, 60 per cent of Asia's population will be 65 years and above by 2030. The Department of Statistics Malaysia has projected that by 2040, the percentage of the elderly in Malaysia will increase to 14.5 per cent. This book combines social, clinical, and health sciences, covering qualitative, quantitative, and mixed method approaches regarding potential business activities, health and financial well-being, and also clinical tests, solutions and proposals that will improve elderly health and care. So, this diverse scope of research will allow more readers, researchers, practitioners, policymakers, and the public to better grasp issues affecting the elderly. The findings will impact personal health and well-being, care service business, knowledge expansion, and application.

**how much to save for retirement malaysia:** *Islamic Finance and Corporate Governance* Muhammad Ali, Syed Ali Raza, Nor Shaipah Abdul Wahab, Chin-Hong Puah, Hanudin Amin, Abadullah, 2025-04-23 Islamic Finance and Corporate Governance addresses matters related to technology, Islamic ventures, risk management, compliance with regulations, and societal responsibility, while advocating for inclusive governance methods. It promotes sustainable development in Islamic finance through efficient corporate governance.

**how much to save for retirement malaysia:** The Economics of Saving and Growth Klaus Schmidt-Hebbel, Luis Servén, 1999-05-13 A look at major research and policy issues surrounding saving across the world, first published in 1999.

**how much to save for retirement malaysia:** *Financial Development and Economic Growth in Malaysia* James B. Ang, 2008-11-25 This book is concerned with the role of financial intermediation in economic development and growth in the context of Malaysia. Using an analytical framework, the author investigates the Malaysian economy from 1960 onwards to examine how far financial development has progressed in the course of economic development, and whether it has been instrumental in promoting economic growth. A significant improvement in the Malaysian financial system, coupled with rapid economic growth and a rich history of financial sector reforms, makes Malaysia an interesting case study for this subject. The author shows that some government interventions seem to have impacted negatively on economic growth, whereas repressionist financial policies such as interest rate controls, high reserve requirements and directed credit programmes seem to have contributed positively to financial development. The analysis concludes that financial development leads to higher output growth via promoting private saving and private investment. Shedding light on the evolutionary role of financial system and the interacting mechanisms between financial development and economic growth, this book will be of interest to those interested in economic and financial development, financial liberalization, saving behaviour and investment analysis and Asian Studies.

**how much to save for retirement malaysia:** The Quadrillion Dollar Bridge Josef Pilger, 2025-04-21 Unlock the secrets to successful retirement planning with insights that will revolutionize the way we make financial decisions In *The Quadrillion Dollar Bridge: Retirement Behaviour*, author Josef Pilger delves into the complex landscape of retirement , systems, decisions, planning, behaviours and outcome expectations providing vital guidance for policymakers, individuals, retirement and financial services providers. Empower yourself and your clients today with the knowledge needed to thrive in a complicated financial landscape.

**how much to save for retirement malaysia: After Work** Shiori Shakuto, 2025-01-07 An ethnography of “silver backpackers” that offers a feminist perspective on what makes a good retirement in contemporary societies The moniker “silver backpackers” refers to Japanese couples who, in their mid-fifties to seventies, move to Malaysia to enjoy their retirement. Recent scholarship on Japan has revealed how the gendered division of labor impacts the lives of middle-class workers and their families. But how do cultural values live on—or change—when these professionals retire from work, move on from identities built through salaried careers, and embark on a new phase of life? After Work takes up this question to focus on what comes after work, and in the process, expands our understanding of aging, gender, migration, and the future of work. Based on fifteen months of fieldwork in Kuala Lumpur and employing a transnational feminist framework, After Work investigates moments of difference in the experiences of older women and men to examine patriarchal conversations that dominate ideas about contemporary retirement. Shiori Shakuto argues that anxiety around self and belonging in retirement are instigated by the capitalist labor regime and the discourse of successful aging, both of which devalue nonremunerated activities conducted at home. What is needed instead, she contends, is a re-valuation of key domestic activities—from caring for children to pursuing individual hobbies—so that “life” can be appreciated in its entirety. Shakuto also takes into account the fact that this transnational retirement is set in Malaysia—a nation that Japan occupied during World War II and thereafter subject to decades of economic investment and resource exploitation by Japanese corporations. Highlighting how historical, cultural, and racialized complexities entangle with intimate relations in increasingly connected Asian countries while simultaneously acknowledging how the boundaries between work and life blur ever more in contemporary society, After Work complicates our perceptions of aging and a “good” retirement as well as our understandings of gender, migration, and the future of work as we know it.

**how much to save for retirement malaysia: Malaysia's Leap Into the Future** Rajah Rasiah, Kamal Salih, Cheong Kee Cheok, 2022-03-21 This book presents the future development of Malaysia. It puts together building blocks to achieve a better future. These blocks are poverty and income inequality, population, demography and urbanization, growth and technological progress, education, human capital and skills, finance, labor, the environment, and health care. It examines the reasons for the decline in the agricultural sector with an emphasis on food security. It discusses Malaysia's economic growth and structural change compared to some of the Northeast East Asian and Southeast Asian countries. It explains the projections of population and demographic change and its bearing on government policies. It evaluates the country's education sector and discusses the strategies to improve its role in the country further. It argues for replacing ethnic-based approaches with a needs-based system for the future direction to build a plural Malaysia. This insightful book is of interest across several fields, including demography, economic development, and urbanization.

**how much to save for retirement malaysia: The Report: Malaysia 2014** Oxford Business Group, 2014-12-08 Malaysia's natural resources and its well-educated population are some of the many credentials that keep the country in good stead, with priorities centred on preparing for the ASEAN Economic Community in 2015 and steering the policy framework toward more inclusive political representation. The economy is built around global trade, and the government is working to encourage greater private investment. Malaysia's GDP per capita is the highest in South-east Asia, with the exception of smaller countries like Singapore and Brunei Darussalam, \$ reaching 10,548 in 2013 based on a GDP of \$ 307.25bn and a population of almost 30m. The country produces 39% of

the world's palm oil and 44% of its exports, and Increasing global demand for the commodity Bodes well for the industry. Malaysia has seen its stock rise in the World was Bank's Annual the Ease of Doing Business report, moving up to 6th position in 2014 from 8th the previous year. 's Avatar Recent times have seen the Government push hard for a Greater role for the : private sector in the country's development, with the various Government Programmes aiming to boost Transparency, accountability and Sustainable Growth. The overall aim of these plans is to elevate Malaysia to become a high -income country by 2020.

**how much to save for retirement malaysia:** **IoT and Digital Transformation: Innovating Business Models for the Connected World** Bahaaeddin Alareeni, Allam Hamdan, 2025-07-28 This book examines how smart devices, sensors, and interconnected data ecosystems are redefining business operations, enhancing customer experiences, and shaping new competitive strategies. In today's hyperconnected world, the Internet of Things (IoT) is more than a technology trend, it is a transformative force driving digital innovation across industries. Offering a comprehensive exploration of IoT's role in business transformation, this book illustrates how traditional models are evolving into agile, data-driven systems. Through diverse research methodologies and real-world case studies, it addresses the key opportunities and challenges presented by connected environments. It serves as a practical guide for business leaders, innovators, and policymakers aiming to harness IoT's full potential for operational excellence and sustainable growth. What You'll Discover: -- [if !supportLists]-- --[endif]--How IoT is enabling new forms of business model innovation -- [if !supportLists]-- --[endif]--Strategies for integrating IoT into digital transformation initiatives -- [if !supportLists]-- --[endif]--Policy and managerial insights for connected industries -- [if !supportLists]-- --[endif]--Case studies and empirical findings across various sectors -- [if !supportLists]-- --[endif]--Multidisciplinary approaches to inclusive, tech-driven innovation Targeted at academics, professionals, executives, researchers, and policymakers, this book delivers the insights, tools, and inspiration needed to lead in an increasingly connected and intelligent business landscape.

**how much to save for retirement malaysia:** *Malaysia's 14th General Election and UMNO's Fall* Edmund Terence Gomez, Mohamed Nawab Mohamed Osman, 2019-10-08 The 2018 Malaysian General Election will stand as a major defining event in Malaysian history, when the ruling Barisan Nasional coalition unexpectedly lost power in the country they had ruled for over half a century. This volume brings together scholars who assess one fundamental factor that brought about this game-changing event in Malaysian politics: intra-elite feuding in the leading Malay-based political parties. This study provides an analysis of individual state politics as well as national trends shaped by the actions of leaders in government and the opposition. An indispensable guide for scholars studying the politics of Malaysia and of Southeast Asia more broadly, it will be of great interest for all readers with an interest in Malaysian politics.

**how much to save for retirement malaysia:** **ICE-BEES 2020** Yozi Aulia Rahman, Andryan Setyadharma, Bayu Wiratama , 2021-05-18 We proudly present the proceedings of 3rd International Conference on Economics, Business and Economic Education Science 2020 (ICE-BEES 2020). It

focuses on the relation of economics, business, education, environment and sustainable development. The issue of economics and sustainable development is important today, especially in the time of Covid-19, not only globally, but also Indonesia nationally to the local level. There are several important issues related to this, both institutionally and the relationships between individuals and groups in supporting the agenda of sustainable development. More than 150 manuscripts were presented at this conference with around 49 of them selected to be published in proceedings. We hope by this conference, discussions on the importance of sustainable development will increasingly become an important concern together and bring better response from the government and social relations for development.
