**ideas for freelance work:** Stress-Proof Your Life (52 Brilliant Ideas) Elisabeth Wilson, 2008-04-01 Let's face it, if you're the type of person who enjoys lighting lavender candles and spending an hour in the bath every night 'chilling out', then you're probably not the type that's going to get that stressed to begin with. Stress-proof your life is for the people who struggle to find time for a shower much less a bath. It's for the ones who are still clicking their mouse or ironing a shirt at 11.30pm. The ones who don't take their annual leave and worry that stress is affecting their health and relationships. Or they would worry if they weren't so knackered and that report wasn't due in at 9am. It's going to take a lot more than a candle-lit bubble bath to sort them out... Elisabeth Wilson. Stress is not a generic thing although it's always treated that way. Some people are really good at avoiding some stresses without realising that they are slaves to another kind. Elisabeth looks at the sources - occupational, genetic and environmental - and reveals 52 clever techniques and ideas that focus on the causes rather than simply telling people how to deal with the symptoms. Here are just some of the chapters to be discovered: \* Admit your addiction! \* The power of positive stress; \* Give a little, get a lot - why volunteering could be the best decision you've ever made; \* Too stressed to sleep? - it happens, here's what to do if it happens to you (Strictly no lavender candles); \* and The 'stop and collapse' effect - if you're fed up with getting sick on the very first day of your holiday, here's how to prevent it. With the 52 Brilliant Ideas series readers can enhance their existing skills with negligible investment of time or money and will substantially improve their performance over the course of a year. Each of the 52 chapters tackles a single aspect of the subject in an entertaining and lively way. At the end of each chapter is a how did it go? feature which allows readers to reflect on the lesson in a classical experiential learning pattern. The tone of each book is personal and informal; readers will feel as though they are having a one-to-one with their favourite coach.

**ideas for freelance work:** Business Idea Fundamentals James David Rockefeller, Most people today are walking around mindlessly, asking other people for good business ideas. Successful business ideas are often formulated on the back of due diligence and serve many people who are looking for solutions to similar problems. Too many individuals are following the crowd into densely populated niches where they will find only fierce competition, because many businesses have already successfully established their credibility there. Frequently, this can make the situation difficult for a new start-up business, because they may have to adjust their prices to compete with other businesses within their niche. If you are looking for business ideas, the best recommendation is for you to look around for a problem. This means looking for groups of people who share the same problem or have a specific need. Your opportunity, then, is to find a solution to the problem and turn

it into a product or service that will be effective in serving these people. Your business ideas must aim to give your customers as much value as possible and keep them happy. Your role is to create anticipation, which will bring them in and keep them coming back for more. Once you have them in the front door, keep them inside by giving them as much value as possible. Be sure to keep a database of contact details, so that you can provide them with any updates you need to release to your customers. E-mail is preferred because there are no costs associated with sending out emails, and it is a simple way to get the message out to many of your customers from the push of a button. Remember, the best business ideas are founded on a solution that solves people's specific needs. If you are looking to start a business in an already populated niche, make sure you think of ways to differentiate your business from the crowd. Give your clients more value for their time and dollars. A very important tip that I would highly suggest you take into consideration is giving away as much free value as possible. Find a way to give as much free and valuable content to your customers as you can. This will help you in becoming an authority and in building greater credibility/trust with your customers. The rise of the internet bears witness to the quote made famous by Bill Gates - Content is King. Content is now cash and any ability your business has to give away free content will benefit your business financially.

**ideas for freelance work:** *Copyright, Contracts, Creators* Giuseppina D'Agostino, 2010-01-01 'Copyright, Contracts, Creators provides a new and original analysis on the relationship between owners and creators and recommendations for legislative change to re-balance the relationship. It is

a must-read for the intellectual property legal community and anyone interested in the promotion of creative works.' - Marshall Rothstein, Justice of the Supreme Court of Canada `Dr Giuseppina D'Agostino is a protector of the arts, and her work on intellectual property is designed not only to bring law and order to our digital universe but to bring hope to the artists, poets and writers whose only hope of pursuing their artistry is to earn income for their craft. A wonderful book by one of the most wonderful and forward thinking minds in this subject area.' -Tony Chapman, Founder and CEO, Capital C, Canada `Dr D `Agostino has produced an important, carefully documented and courageous study that deserves to be widely read and discussed and (dare one say?) even to have its message heeded.' - David Vaver, University of Oxford, UK. Copyright, Contracts, Creators evaluates the efficacy of current copyright law to address the contracting and use of creative works. It looks in particular at freelance works and argues that their copyright treatment on a national and international level is inadequate to resolve ambiguities in the contracting and uses of the work. Giuseppina D'Agostino discusses how historically laws and courts were more sympathetic to creators, and how the Internet revolution has shifted the scales to favour owners. Consequently, creators often find themselves at opposing ends with copyright owners, and in a disproportionately weaker bargaining position that places tremendous strain on their livelihoods. She argues that this predicament puts society at risk of losing its most valued asset: professional creators. The author calls for a new framework to justify legislative provisions and resolve ambiguities while suggesting principles and mechanisms to address the inadequate treatment of freelance work.

**ideas for freelance work:** *Metrics at Work* Angèle Christin, 2020-06-30 The starkly different ways that American and French online news companies respond to audience analytics and what this means for the future of news When the news moved online, journalists suddenly learned what their audiences actually liked, through algorithmic technologies that scrutinize web traffic and activity. Has this advent of audience metrics changed journalists' work practices and professional identities? In *Metrics at Work*, Angèle Christin documents the ways that journalists grapple with audience data in the form of clicks, and analyzes how new forms of clickbait journalism travel across national borders. Drawing on four years of fieldwork in web newsrooms in the United States and France, including more than one hundred interviews with journalists, Christin reveals many similarities among the media groups examined—their editorial goals, technological tools, and even office furniture. Yet she uncovers crucial and paradoxical differences in how American and French journalists understand audience analytics and how these affect the news produced in each country. American journalists routinely disregard traffic numbers and primarily rely on the opinion of their peers to define journalistic quality. Meanwhile, French journalists fixate on internet traffic and view these numbers as a sign of their resonance in the public sphere. Christin offers cultural and historical explanations for these disparities, arguing that distinct journalistic traditions structure how journalists make sense of digital measurements in the two countries. Contrary to the popular belief that analytics and algorithms are globally homogenizing forces, *Metrics at Work* shows that computational technologies can have surprisingly divergent ramifications for work and organizations worldwide.
