Understanding Doomscrolling

Doomscrolling, often referred to as doomsurfing, is the act of spending an excessive amount of time scrolling through negative news and social media feeds, even though it is making you feel worse. It's a compulsion driven by a desire to stay informed, but paradoxically, it often leads to increased anxiety, stress, and feelings of helplessness. This phenomenon has been amplified by the 24/7 news cycle and the inherent design of social media platforms, which are engineered to maximize user engagement.

The constant barrage of distressing updates, from global crises to personal tragedies, can create a distorted perception of reality, where the world appears overwhelmingly bleak. This prolonged exposure to negativity can have significant detrimental effects on an individual's mental and

emotional health, making it crucial to develop effective strategies to combat this habit.

The Psychology Behind the Scroll

The urge to doomscroll is rooted in a complex interplay of psychological factors. One primary driver is the inherent human need to be informed and aware of potential threats. Our brains are wired to pay attention to negative stimuli, a survival mechanism that once helped us avoid danger. In the context of social media, this instinct is constantly triggered, leading us to seek out and process information that signals potential risks, even if those risks are abstract or beyond our immediate control.

Another significant factor is the concept of "fear of missing out" (FOMO), coupled with a sense of obligation to stay informed. Users may feel that by disengaging, they will be unaware of critical developments, leaving them unprepared or out of the loop. The variable reward system of social media, where each scroll might reveal something new or significant, also plays a role, similar to gambling, creating a loop of anticipation and engagement that is difficult to break.

Recognizing the Signs of Doomscrolling

Identifying doomscrolling in your own behavior is the first critical step toward stopping it. Subtle cues often indicate that you've fallen into this pattern. One of the most obvious signs is the amount of time you spend on Twitter without realizing it, often losing track of hours. You might find yourself feeling increasingly anxious, stressed, or depressed after browsing your feed, yet you continue to scroll, seeking some form of resolution or understanding.

Other indicators include neglecting responsibilities, such as work, chores, or social interactions, in favor of scrolling. You might experience disrupted sleep patterns, a constant feeling of dread, or an inability to focus on tasks. If you find yourself frequently revisiting upsetting news or arguments, even when it provokes negative emotions, it's a strong signal that doomscrolling has taken hold.

Strategies to Stop Doomscrolling on Twitter

Fortunately, there are numerous practical and effective strategies to help you break the cycle of doomscrolling on Twitter. These methods focus on both actively changing your behavior and proactively managing your environment and mindset. Implementing a combination of these techniques can lead to a healthier relationship with social media and improved mental well-being.

Setting Digital Boundaries

Establishing clear digital boundaries is paramount to regaining control. This involves consciously deciding when and for how long you will engage with social media. Many devices offer built-in tools or can be supplemented with third-party applications that allow you to set time limits for specific apps, including Twitter. Once the allotted time is up, the app will block access, providing a much-needed enforced break.

Another effective boundary is to designate specific times of day for checking social media. Avoid opening Twitter first thing in the morning or right before bed, as these times can significantly impact your mood and sleep quality. Instead, choose a short window in the middle of your day when you can engage more mindfully and then disconnect.

Curating Your Twitter Feed

The content you consume directly influences your emotional state. Actively curating your Twitter feed is a powerful way to reduce exposure to negativity and increase exposure to positive or neutral content. This involves unfollowing accounts that consistently share distressing news, inflammatory content, or information that triggers anxiety. It also means actively seeking out and following accounts that share uplifting stories, educational content, hobbies, or humor.

Utilizing Twitter's "Mute" function is another excellent tool. You can mute specific keywords, phrases, or even entire conversations that tend to be a source of distress without unfollowing the accounts themselves. This allows you to maintain connections while filtering out unwanted noise. Regularly reviewing your follower list and actively pruning it can transform your feed from a source of anxiety into a more balanced and manageable space.

Mindful Engagement with Content

Beyond simply limiting time and curating content, practicing mindful engagement is crucial. This means approaching your time on Twitter with intention and awareness. Before you open the app, ask yourself why you are doing so. Are you looking for specific information, connecting with someone, or simply seeking a distraction? Being honest about your intentions can help prevent mindless scrolling.

During your browsing session, pay attention to how the content makes you feel. If you notice a tweet or a thread is increasing your anxiety or distress, have the self-awareness to stop and move on. This doesn't mean avoiding important news, but rather processing it in a healthy way and knowing when to disengage. Practice active reading and critical thinking, rather than passively absorbing information.

Developing Alternative Activities

One of the most effective ways to stop doomscrolling is to fill the time you would have spent scrolling with more fulfilling and constructive activities. Identify hobbies and interests that genuinely bring you joy and relaxation. This could include reading physical books, engaging in creative pursuits like drawing or writing, exercising, spending time in nature, or connecting with friends and family in person or through phone calls.

The key is to replace the passive consumption of social media with active participation in life. When the urge to scroll arises, consciously redirect your energy towards one of these pre-planned alternative activities. Having a list of go-to activities readily available can make this transition much smoother and more effective.

Seeking Professional Support

For some individuals, doomscrolling can be a symptom of deeper underlying issues such as anxiety, depression, or obsessive-compulsive tendencies. If you find that you are unable to break the habit on your own, or if the negative impacts on your mental health are significant and persistent, seeking professional support is highly recommended. A therapist or counselor can help you explore the root causes of your behavior and develop personalized coping mechanisms and strategies.

Cognitive Behavioral Therapy (CBT) and mindfulness-based interventions are particularly effective in addressing addictive behaviors and managing anxiety. A mental health professional can also help you build resilience and develop healthier emotional regulation skills, which will benefit you far beyond just your social media habits.

The Long-Term Benefits of Breaking the Cycle

Breaking free from doomscrolling on Twitter yields substantial long-term benefits for your overall well-being. You will likely experience a significant reduction in anxiety and stress levels, leading to improved mood and a greater sense of peace. Your ability to concentrate and focus on important tasks will increase, boosting productivity in both your personal and professional life.

Furthermore, you will reclaim valuable time that can be invested in more meaningful pursuits, fostering personal growth and stronger relationships. By cultivating a healthier relationship with technology, you empower yourself to engage with the world around you more fully and positively, free from the constant weight of digital negativity.

Q: What are some healthy alternatives to doomscrolling on Twitter?

A: Healthy alternatives to doomscrolling include engaging in hobbies, reading a book, exercising, spending time outdoors, meditating, listening to podcasts, calling a friend, or pursuing creative activities like drawing or writing. These activities provide a sense of accomplishment and relaxation, counteracting the stress of doomscrolling.

Q: Does doomscrolling on Twitter affect sleep quality?

A: Yes, doomscrolling on Twitter can significantly affect sleep quality. The blue light emitted from screens can disrupt melatonin production, making it harder to fall asleep. Furthermore, the anxiety and stress induced by negative content can lead to racing thoughts, preventing restful sleep.

how to stop doomscrolling on twitter: The Big Break Ben Terris, 2023-06-06 No one gets today's Washington like Ben Terris...THE BIG BREAK is the definitive accounting of 'how it works' in this ongoing post-Trump (pre-Trump?) maelstrom. I just imbibed this book. —Mark Leibovich, author of This Town In this fascinating investigation into the real life inner workings of a post-Trump American government, uncover the odd and eccentric personalities grappling for their own bit of power in D.C. The Big Break investigates how Washington works, and how different kinds of people try to make it work for them. Ben Terris presents an inside history of this crucial moment in Washington, reporting from exclusive parties, poker nights, fundraisers, secluded farms outside town and the halls of Congress; among the oddballs and opportunists and true believers. This book is about the people who see this moment as an opportunity to bet big—on their country or maybe just on themselves. It will take a close look at Washington's bold-faced names as they try to get their bearings on the post-Trump (and possibly pre-Trump) landscape. And it will introduce readers to the behind-the-scenes players — MAGA pilgrims and Resistance flamekeepers and shapeshifting veterans — who believe they know what Washington, and America, must do if they're going to survive, or even thrive. Trump's arrival in Washington represented a big break in how the city operated. He surrounded himself with outsiders; power structures reorganized around those who knew him or his family and those who could flatter and influence his base. He changed the way the game was played, only it wasn't actually a game at all. When pro-Trump elements both inside and outside of government plotted to overturn his loss in the 2020 presidential election, the Capitol became a combat zone, then a military fortress. It was, to put it lightly, a destabilizing time. But how much did the Trump years really change Washington? Has Joe Biden's presidency heralded a return to normal, as many had hoped? What did 'normal' mean before Trump, and what do people think it means now? The Big Break will follow a cast of D.C. characters in search of answers to these questions. They are a diverse crew—a pollster with a gambling habit, an oil heiress with a big heart, a cowboy lobbyist, a Republican kingmaker who decided to love Trump and his right-hand man who decided he couldn't any longer. They all share at least one thing in common: They had seen their country go through a Big Break, and they'd come to get theirs.

how to stop doomscrolling on twitter: *Reading Mediated Life Narratives* Amy Carlson, 2024-01-25
Calling attention to the unseen mediation and re-mediation of life narratives in online and physical spaces, this ground-breaking exploration uncovers the ever-changing strategies that authors, artists, publishers, curators, archivists and social media corporations adopt to shape, control or resist the auto/biographical in these texts. Concentrating on contemporary life texts found in the material book, museums, on social media and archives that present perceptions of individuality and autonomy, *Reading Mediated Life Narratives* exposes the traces of personal, cultural, technological, and political mediation that must be considered when developing reading strategies for such life narratives. Amy Carlson asks such questions as what agents act upon these narratives; what do the text, the creator, and the audience gain, and what do they lose; how do constantly evolving technologies shape or stymie the auto/biographical “I”; and finally, how do the mediations affect larger issues of social and collective memory? An examination of the range of sites at which vulnerability and intervention can occur, Carlson does not condemn but stages an intercession, showing us how it is increasingly necessary to register mediated agents and processes modifying the witnessing or recuperation of original texts that could condition our reception. With careful thought on how we remember, how we create and control our pictures, voices, words, and records, *Reading Mediated Life Narratives* reveals how we construct and negotiate our social identities and memories, but also what systems control us.

how to stop doomscrolling on twitter: *I, Human* Tomas Chamorro-Premuzic, 2023-02-28 For readers of *Sapiens* and *Homo Deus* and viewers of *The Social Dilemma*, psychologist Tomas Chamorro-Premuzic tackles one of the biggest questions facing our species: Will we use artificial intelligence to improve the way we work and live, or will we allow it to alienate us? It's no secret that AI is changing the way we live, work, love, and entertain ourselves. Dating apps are using AI to pick our potential partners. Retailers are using AI to predict our behavior and desires. Rogue actors are using AI to persuade us with bots and misinformation. Companies are using AI to hire us—or not. In *I, Human* psychologist Tomas Chamorro-Premuzic takes readers on an enthralling and eye-opening journey across the AI landscape. Though AI has the potential to change our lives for the better, he argues, AI is also worsening our bad tendencies, making us more distracted, selfish, biased, narcissistic, entitled, predictable, and impatient. It doesn't have to be this way. Filled with fascinating insights about human behavior and our complicated relationship with technology, *I, Human* will help us stand out and thrive when many of our decisions are being made for us. To do so, we'll need to double down on our curiosity, adaptability, and emotional intelligence while relying on the lost virtues of empathy, humility, and self-control. This is just the beginning. As AI becomes smarter and more humanlike, our societies, our economies, and our humanity will undergo the most dramatic changes we've seen since the Industrial Revolution. Some of these changes will enhance our species. Others may dehumanize us and make us more machinelike in our interactions with people. It's up to us to adapt and determine how we want to live and work. The choice is ours. What will we decide?

how to stop doomscrolling on twitter: *The Quarantine Atlas* Laura Bliss, A Bloomberg CityLab Project, 2022-04-19 *The Quarantine Atlas* is a poignant and deeply human collection of more than 65 homemade maps created by people around the globe that reveal how the coronavirus pandemic has transformed our physical and emotional worlds, in ways both universal and unique. Along with eight original essays, it is a vivid celebration of wayfinding through a crisis that irrevocably altered the way we experience our environment. In April 2020, Bloomberg CityLab journalists Laura Bliss and Jessica Lee Martin asked readers to submit homemade maps of their lives during the coronavirus pandemic. The response was illuminating and inspiring. The 400+ maps and accompanying stories received served as windows into what individuals around the world were experiencing during the crisis and its resonant social consequences. Collectively, these works showed how coronavirus has transformed the places we live, and our relationships to them. In *The Quarantine Atlas*, Bliss distills these stunning submissions and pairs them with essays by journalists and authors, as well as notes from the original mapmakers. The result is an enduring visual record of this unprecedented moment in human history. It is also a celebration of the act of mapping and the ways maps can help us connect and heal from our shared experience.

how to stop doomscrolling on twitter: *Expressive Networks* Matthew Kilbane, 2025-06-10 *Expressive Networks* convenes an urgent conversation on digital media and the social life of contemporary poetry. Tracing how poems circulate through online spaces and how capitalized platforms have come to pattern the reading and writing of poetry, contributors emphasize both the expressivist cast of digital literary culture and the deep-running ambivalence that characterizes aesthetic and critical responses to platformed cultural production. The volume features chapters on Pan- African spoken word programs, Singaporean Facebook groups, decolonial hemispheric networks, and Japanese media-critical poetries as well as platforms such as Twitter/X, Instagram, and Amazon. Though contributors write from a variety of methodological positions and address

themselves to a range of archives, they share the primary conviction that the impact of Web 2.0 on literary practice is far-reaching, far from self-evident, and far more variegated and unpredictable than easy summations of social media's influence suggest. Expressive Networks asks after poetry's present and future by examining what poems themselves express about the social make-up of networked platforms. Edited by Matthew Kilbane with contributions from Cameron Awkward-Rich, Micah Bateman, Andrew Campana, Sumita Chakraborty, Scott Challener, C.R. Grimmer, Tess McNulty, Michael Nardone, Seth Perlow, Anna Preus, Susanna Sacks, Carly Schnitzler, Melanie Walsh, and Samuel Caleb Wee.

how to stop doomscrolling on twitter: *The Internet Is for Cats* Jessica Maddox, 2022-10-14
LOL cats. Grumpy Cat. Dog-rating Twitter. Pet Instagram accounts. It's generally understood the internet is for pictures of cute cats (and dogs, and otters, and pandas). But what motivates people to make and share these images, and how do they relate to other online social practices? *The Internet is for Cats* examines how animal images are employed to create a lighter, more playful mood, uniting users within online spaces that can otherwise easily become fractious and toxic. Placing today's pet videos, photos, and memes within a longer history of mediated animal images, communication scholar Jessica Maddox also considers the factors that make them unique. She explores the roles that animals play within online economies of cuteness and attention, as well as the ways that animal memes and videos respond to common experiences of life under neoliberalism. Conducting a rich digital ethnography, Maddox combines observations and textual analysis with extensive interviews of the people who create, post and share animal media, including TikTok influencers seeking to make their pets famous, activists tweeting about wildlife conservation, and Redditors upvoting every cute cat photo. *The Internet is for Cats* will leave you with a new appreciation for the human social practices behind the animal images you encounter online.

The truth is that work-life balance has been highly affected because of the work from home model, and the 'new normal'. As a matter of fact... Seven in 10 Americans working from home during COVID-19 are struggling to maintain a healthy work-life balance. 65% of people admit that now that they're working remotely, they're working longer hours than ever before. 56% of people say they're more stressed about work than ever before when working from home during COVID-19. The average workday lengthened by 48.5 minutes following stay-at-home orders and lockdowns. 40% of remote workers say unplugging after hours is the biggest challenge of working remotely. 67% of people working remotely feel pressure to be available at all hours of the day. 29% of remote workers say they struggle to have a work-life balance, compared to 23% of in-office employees. Though #workfromhome has mostly been a blessing, there are a few drawbacks - the skewed work-life balance is one of them. According to the Harvard Business Review, close to \$190 billion is spent on employees facing burnout. A poor work-life balance is one of the major reasons for burnout, and therefore, must be addressed at the earliest. Especially given the unpredictable, often under-pressure workplace environment and the added blurring of lines between work and personal because of the need to work from home more often due to COVID. If you want to have a more

balanced life then it's important to understand what balance even is. Because most people get it wrong and end up feeling stressed, tired, and overworked with no time for themselves, their families, and friends. Well, not anymore... Because we are about to show you what is the right work-life balance and how you can achieve it in the new normal quickly and easily... Learn How To Manage Your Work Environment During This Pandemic To Create A Better Work-Life Balance! A comprehensive guide that will help you to achieve work-life balance as a remote worker, get control of your life and adopt healthy lifestyle changes.

how to stop doomscrolling on twitter: Dancing With Robots Bill Bishop, 2022-02-15 Survive and thrive in a world being taken over by robots and other advanced technology. Artificial intelligence, machine learning, algorithms, blockchains, the Internet of Things, big data analytics, 5G networks, self-driving cars, robotics, 3D printing. In the coming years, these technologies, and others to follow, will have a profound and dramatically disruptive impact on how we work and live. Whether we like it or not, we need to develop a good working relationship with these technologies. We need to know how to "dance" with robots. In *Dancing with Robots*, futurist, entrepreneur, and innovation coach Bill Bishop describes 29 strategies for success in the New Economy. These new strategies represent a bold, exciting, unexpected, and radically different road map for future success. Bishop also explains how our Five Human Superpowers — embodied pattern recognition, unbridled curiosity, purpose-driven ideation, ethical framing, and metaphoric communication — give us a competitive edge over robots and other advanced technology in a world being taken over by automation and AI.

how to stop doomscrolling on twitter: Disability in Dialogue Jessica M.F. Hughes, Mariaelena Bartesaghi, 2023-09-15 What would it mean to invite disability into dialogue? *Disability in Dialogue* attunes us to the dialogues of and about disability. In the pages of this book, we ask readers to consider the dialogic constitution of disability and to imagine its reformulation. We find the voices, bodies, social norms, visceral experiences, discourses, and acts of resistance that materialize disability in all its dialogic and enfleshed complexity: tensions, contradictions, provocations, frustrations and desires. This volume makes a unique contribution, bringing together authors from disciplines as diverse as communication, dialogue studies, psychology, sociology, design, rhetoric and activism. Because we take dialogue seriously, this book is designed to be brave as we examine the ways of being in the world that dialogic practices engender and allow, as well as beckon to continue. By way of a variety of frameworks, such as discourse analysis, dialogue studies, narrative analysis, and critical approaches to discourse, the chapters of this book take us through a polylogue of and about disability, demanding that we consider our own roles in bringing forth disabled ways of being and how we might, instead, choose ways that enable our common existence.
