newton mail alternative 2023: Handbook of Academic Integrity Sarah Elaine Eaton, 2023-12-04 The book brings together diverse views from around the world and provides a comprehensive overview of academic integrity and how to create the ethical academy. At the same time, the Handbook does not shy away from some of the vigorous debates in the field such as the causes of academic integrity breaches. There has been an explosion of interest in academic integrity in the last 20-30 years. New technologies that have made it easier than ever for students to 'cut and paste', coupled with global media scandals of high profile researchers behaving badly, have resulted in the perception that plagiarism is 'on the rise'. This, in combination with the massification and commercialisation of higher education, has resulted in a burgeoning interest in the importance of academic integrity, how to safeguard it and how to address breaches appropriately. What may have seemed like a relatively easy topic to address – students copying sources without attribution – has in fact, turned out to be a complex, interdisciplinary field of research requiring contributions from linguists, psychologists, social scientists, anthropologists, teaching and learning specialists, mathematicians, accountants, medical doctors, lawyers and philosophers, to name just a few. Because of this broad interest and input, this handbook serves as the single authoritative reference work which brings together the vast, growing, interdisciplinary and at times contradictory body of literature. For both established researchers/practitioners and those new to the field, this Handbook provides a one-stop-shop as well as a launching pad for new explorations and discussions.

newton mail alternative 2023: Field Environmental Philosophy Ricardo Rozzi, Alejandra Tauro, Noa Avriel-Avni, T. Wright, Roy H. May Jr., 2023-06-23 This fifth volume in the Ecology and Ethics series integrates key concepts of the previous four volumes by addressing biocultural conservation through novel educational methods. In Field Environmental Philosophy (FEP), the authors undertake two complementary tasks. First, they address a problematic facet of education as an indirect driver of a global change and biocultural homogenization. Second, they contribute to solve the former problems by introducing the FEP method as well as other educational approaches from around the world that value and foster conservation of biological and cultural diversity. A particular emphasis is therefore on the integration of sciences, arts, humanities, and ethics into educational practices that involve the participation of local communities with their diverse forms of ecological knowledge and practices. The book is divided into four parts. Part I introduces FEP concepts and practices that involve a 4-step cycle of transdisciplinary research, poetic communication through composition of metaphors, design of field activities guided with an ecological and ethical orientation, and participation in biocultural conservation activities. Part II

exposes problems as well as solutions in formal education (from preschool to higher education) and non-formal education to respect biocultural diversity. Parts III & IV provide case studies developed at long-term socio-ecological research (LTSER) sites, botanical gardens, and other platforms for non-formal education that contribute to biocultural conservation. This book supports a paradigm shift addressing still understudied indirect drivers of global change to foster the conservation of biological and cultural diversity. It is a valuable asset for scientists and practitioners in science and humanities education.

newton mail alternative 2023: Nuns in Popular Culture Marcus K. Harmes, Meredith A. Harmes, 2024-08-08 Films and television programs about nuns (women in a religious order) are among the most successful and popular we watch, from old favorites like *The Sound of Music* to recent smash hits like *Call the Midwife* and *Mrs. Davis*. This new collection studies the fascinating and often controversial ways nuns have been portrayed in popular media, such as warriors, career women, and agents of supernatural horror. Specialist contributors in popular culture study more than a century of works from around the globe in genres as diverse as musicals, horror films, and even heavy metal music videos.

newton mail alternative 2023: Realism for Social Sciences Ken Urai, Masaaki Katsuragi, Yoshiyuki Takeuchi, 2023-11-13 This book discusses the growing interest in realism in social sciences of the twenty-first century. The first part of this book provides recent discussions on realism in philosophy. The second part describes specific problems that have returned to realism in various fields of the social sciences, such as economics, cultural anthropology, management science, and statistics. This book clarifies what kinds of movements are taking place and consequently the direction in which the social sciences are heading in the future. Readers would also find that there is great diversity in the way realism and reality are perceived and understood, depending on the objectives and circumstances of each field of social science. This suggests that rather than having a unified view (stance) of realism and reality, it may be more meaningful to value the differences, diversity, and range itself. Therefore, this book does not present a unified view of realism, reality, and actuality. Although the definitions of realism and reality may differ from chapter to chapter, this represents a corner of the current state of the social sciences. This book is unique in that it examines how the issues of realism and reality are viewed, understood, and dealt with in the various fields of social science, instead of examining them by philosophers and philosophers of science. This would clarify how philosophical discussions have been translated into the various fields of social science.

newton mail alternative 2023: ETINED - Volume 7 - Means to counter education fraud Michael Draper, Dennis Farrington, Chiara Finocchietti, André Hesselbäck, Luca Lantero, Erik Johansson, Phil Newton, 2023-11-01 In July 2022, the Committee of Ministers of the Council of Europe adopted Recommendation CM/Rec(2022)18 aimed at assisting its member states in combating fraud in the field of education. The recommendation followed four years of work in the

framework of the ETINED platform of the Council of Europe on ethics, integrity and transparency in education, and addresses the need for a common European approach in this field. This new international standard is structured in four dimensions: prevention, prosecution, international co-operation and monitoring. The text makes six main recommendations to member states of the Council of Europe: to promote high-quality education by eliminating education fraud; to protect pupils, students, researchers and staff at all levels of education from organisations and individuals engaged in selling (and advertising) fraudulent services; to provide support for the implementation of preventive and protective measures, as well as a culture of equality of opportunity at all levels and in all sectors of education and training, and in the transition between these sectors; to monitor technological developments that could support new forms of fraud; to facilitate international co-operation in the field; to support wide dissemination of the recommendation. The research studies in this book analyse the situation in countering education fraud in some member states at the time when the recommendation was adopted and give suggestions for consistent implementation of it in the future.
