schedule recurring tasks app: Software Technologies for Embedded and Ubiquitous Systems Sunggu Lee, Priya Narasimhan, 2009-11-03 The 7th IFIP Workshop on Software Technologies for Future Embedded and Ubiquitous Systems (SEUS) followed on the success of six previous editions in Capri, Italy (2008), Santorini, Greece (2007), Gyeongju, Korea (2006), Seattle, USA (2005), Vienna, Austria (2004), and Hokodate, Japan (2003), establishing SEUS as one of the emerging workshops in the field of embedded and ubiquitous systems. SEUS 2009 continued the tradition of fostering cross-community scientific excellence and establishing strong links between research and industry. The fields of both embedded computing and ubiquitous systems have seen

considerable growth over the past few years. Given the advances in these fields, and also those in the areas of distributed computing, sensor networks, middleware, etc., the area of ubiquitous embedded computing is now being envisioned as the way of the future. The systems and technologies that will arise in support of ubiquitous embedded computing will undoubtedly need to address a variety of issues, including dependability, real-time, human-computer interaction, autonomy, resource constraints, etc. All of these requirements pose a challenge to the research community. The purpose of SEUS 2009 was to bring together researchers and practitioners with an interest in advancing the state of the art and the state of practice in this emerging field, with the hope of fostering new ideas, collaborations and technologies. SEUS 2009 would not have been possible without the effort of many people.

You will have everything you need to build your own system, a system that works for you. Many productivity systems promise to help you get your work done. New apps appear daily, promising

they will make you more productive, and countless blog posts, YouTube videos, and podcasts tell you to try this or that new innovative idea. The truth is, the only way you will get more done is to do more. No new app, system, or idea will ever replace that simple fact! But there is a problem with this—To get more done, you have to do more—in a way, counter to the culture we live in today. We are supposed to take more breaks, be more gentle with ourselves to protect our mental, health, and slow down when we feel tired. All good advice, but it does not help us to be more productive if to be more productive means we have to do more.
